

<u>COURSE OVERVIEW ME0062-4D</u> <u>Heat Exchanger Design, Operation, Performance, Inspection,</u> <u>Maintenance & Repair</u>

CEUS

24 PDHs)

Course Title

Heat Exchanger Design, Operation, Performance, Inspection, Maintenance & Repair

Course Reference

ME0062-4D

Course Duration/Credits Four days/2.4 CEUs/24 PDHs

Course Date/Venue

Session(s)	Date	Venue
1	January 15-18, 2024	Ajman Meeting Room, Grand Millennium Al Wahda Hotel, Abu Dhabi, UAE
2	March 04-07, 2024	Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE
3	June 10-13, 2024	Cheops Meeting Room, Radisson Blu Hotel, Istanbul Sisli, Turkey, Istanbul Turkey
4	September 23-26, 2024	Jubail Hall, Signature Al Khobar Hotel, Al Khobar, KSA

Course Description

The design, performance and operation of modern heat exchangers require an understanding of the principles of heat transfer and fluid flow, coupled with access to numerically based techniques and supporting data.

This course will review heat transfer fundamentals as applied to tubular and plate devices. Included will be sessions on the practical aspects of shell and tube heat exchanger design with ASME and TEMA codes.

Upon completion of this course, delegates will gain an understanding of the basic principles of heat transfer and fluid flow and their application to the design, operation and maintenance of shell and tube heat exchangers as well as compact and air cooled heat exchangers.

Participants will gain an understanding of TEMA and ASME codes and learn how to numerically analyze the different heat exchanger configurations. Attention will be paid to the recognition and solving of a wide variety of industrial problems, taking existing case studies.

ME0062-4D - Page 1 of 8

The course will also address the ways in which systematic techniques of inspection and maintenance (including Fouling Control) can alleviate major problem areas. Further, the course will explain the Energy Balance in Heat Exchangers and discuss the new technologies of Heat Transfer and heat exchanger within the industry.

There will be troubleshooting workshops devoted to the discussion of regularly occurring heat exchanger problems, performance assessment and methods to improve the overall thermal efficiencies of these devices.

The course will also cover current methods of inspection and maintenance.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Design, operate, inspect, maintain and repair heat exchangers and analyse their performance in a professional manner
- Employ the concepts of heat transfer coefficients and determine their overall effect on heat exchanger fouling
- Differentiate between the various types of heat exchangers and learn more of their industrial features and other relevant information
- Discuss the industrial features and other information that explain distributed types in relation to power cycles, distillation, recuperators and regenerators
- Carryout heat exchanger analysis for counter flow, cross flow and multipass heat exchangers and to apply the well-known correction factors
- Conduct a heat energy balance for different types of counter flow heat exchangers
- Practice the process of heat exchanger selection for a given application and its costing in line with the advantages and disadvantages of its types and scopes of its applications
- Determine the cooling performance of a range of heat exchangers, including an automotive/industrial compact radiator
- Establish insights on the effectiveness/NTU method for heat exchanger analysis in terms of capacity ratios
- Interpret TEMA standards and terminologies for present-day shell and tube heat exchangers
- Enhance comprehension of the practices and principles of heat exchanger maintenance and inspection techniques with its common inspection tools and codes

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (**H-STK**[®]). The **H-STK**[®] consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

ME0062-4D - Page 2 of 8

ME0062-4D-01-24|Rev.749|11 September 2023

Who Should Attend

This course provides a wider and deeper appreciation of heat exchanger design, performance, inspection, maintenance and operation in the oil, chemical and other process industries. Project engineers, process engineers, plant and maintenance engineers and supervisors will gain an excellent numerical problem solving skills in the practical approach of the course. The course is also useful to those generally knowledgeable on the subject, but who may require a refresher or update. No prior knowledge of heat transfer is required. Participants will be taken through an intensive primer of heat transfer principles as they apply to shell and tube heat exchangers.

Training Methodology

This interactive training course includes the following training methodologies as a percentage of the total tuition hours:-

30% Lectures20% Workshops & Work Presentations30% Case Studies & Practical Exercises20% Software, Simulators & Videos

before or during the course for technical reasons.

In an unlikely event, the course instructor may modify the above training methodology

Course Fee

Al Khobar	US\$ 4,500 per Delegate + VAT . This rate includes H-STK [®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Istanbul	US\$ 5,000 per Delegate + VAT . This rate includes Participants Pack (Folder, Manual, Hand-outs, etc.), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Abu Dhabi	US\$ 4,500 per Delegate + VAT . This rate includes H-STK [®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day
Dubai	US\$ 4,500 per Delegate + VAT . This rate includes H-STK [®] (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

ME0062-4D - Page 3 of 8

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

• ACCREDITE PROVIDE

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **2.4 CEUs** (Continuing Education Units) or **24 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

• BAC

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Ahmed Mady is a Senior Mechanical Engineer and Project Manager with over 40 years of practical experience. His experience covers Pump Selection, Installation, Performance & Control, Pump & Valve Operation, Control, Maintenance & Troubleshooting, Aviation Fueling Operations, Pumps, Compressors & Turbines Selection, Operation, Heat Exchanger Design, Operation,

Performance, Inspection, Maintenance & Repair, Steam Boilers Operation, Maintenance and Control System, Heat Exchangers Operations, Maintenance & Troubleshooting, Water Tanks Filling Station Operation, Water Pipes Inspection & Repair, Water Treatment Technology, RO Plants, MSF Plants, Industrial Water Treatment, Piping System, Water Filtering, Pump Selection, Installation, Performance & Control, Compressors & Turbines Selection & Operation, Heat Exchangers Design & Selection, TEMA & ASME Section VIII Requirements, Steam Boilers Operation & Maintenance, Valve Operation & Troubleshooting, Aviation Fueling Operations, Maintenance Management, Reliability Engineering, Maintenance Auditing, Reliability Centered Maintenance. Maintenance Benchmarking, Maintenance Planning, Root Cause Failure Analysis, Lubrication Technology, Cost Control & Performance Improvement.

Mr. Ahmed has travelled all over **Europe**, **Asia** and the **Americas** joining numerous conferences and workshops with international companies such as **IBM**, System Science Corporation (**SSC**) and International Air Transport Association (**IATA**).

Earlier in his career, he had occupied several challenging roles with several large Logistics and maintenance companies as a **Maintenance Manager**, **Maintenance Engineer**, **Logistics Planning Branch Chief**, **Commander** of the Air Force Logistics, **Systems Analyst**, **Training Branch Chief**, **Systems & Communication Engineer** and **Computer Programmer**.

Mr. Ahmed has a Bachelor degree in Mechanical Engineering and a Certified Trainer/Instructor. Further, he has gained Diplomas on Civil Aviation Engineering, Islamic Studies and Information Systems & Technology. Moreover, he is a Certified Internal Verifier by City & Guilds Level 4 Certificate in Leading the Internal Quality Assurance of Assessment Processes & Practice under the IQA Qualification (Internal Quality Assurance) and a Certified Assessor by City & Guilds Level 3 Certificate in Assessing Vocational Achievement under the TAQA Qualification (Training, Assessment & Quality Assurance) and a Certified Trainer/Assurance/Internal Verifier of the British Institute of Leadership & Management (ILM), UK. Further, he has delivered numerous trainings, workshops and conferences and projects worldwide.

ME0062-4D - Page 5 of 8

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1	
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
08915 - 0830	PRE-TEST
0830 - 0900	<i>Introduction & Definition of Heat Transfer Coefficients</i> <i>Conduction • Convection • Overall Heat Transfer • Logarithmic Temperature</i> <i>Differences • Correction Factors • Fouling • Effectiveness</i>
0900 - 0930	Types of Heat ExchangersDouble-PipeParallel-Flow and Counter-FlowCompactShell and Tube• Plate and Frame• Regenerative• Condensers• Boilers• Space Radiators• Addition of Fins
0930 - 0945	Break
0945 - 1030	Worked Examples Calculation of Overall Heat Transfer Coefficient for a Heat Exchanger • Effect of Fouling on the Overall Heat Transfer Coefficient • Introduction to Condensation of Steam in a Condenser
1030 - 1130	<i>Industrial Features and Additional Information</i> <i>Industrial Distribution of Different Types</i> • <i>Condensation, Evaporation, Heat</i> <i>Recovery, Heat Rejection</i> • <i>Power Cycles, Distillation, Recuperators,</i> <i>Regenerators</i>
1130 - 1230	Heat Exchanger Analysis in DetailLogarithmic Mean Temperature Difference Method• Effectiveness- NTUMethod•
1230 – 1245	Break
1245 - 1420	Counter Flow, Cross Flow & Multipass Heat Exchangers Application of Correction Factors • Worked Example
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

Dav 2

Day Z		
0730 – 0930	Heat Exchanger Energy Balance	
	Pre-heat Calculations • Energy Moduling	
0930 - 0945	Break	
0945 - 1030	Counter Flow Heat Exchanger	
	Worked Example for Double-Pipe Arrangement	
	Heat Exchanger Selection for a Given Process	
	Course and Fine Filters • General Points on Material Selection and Pressures •	
1030 - 1130	Thermal Effectiveness • Advantages and Disadvantages of Double-Pipe	
	Arrangements and Scope of Application • Common Materials Used • Shell and	
	Tube Heat Exchangers	
1130 - 1230	Heat Exchanger Selection for a Given Process (cont'd)	
	Plate and Frame Heat Exchangers • Advantages and Disadvantages of these	
	Types and Scopes of Application • Air-Cooled Heat Exchangers • Plate-fin	
	heat Exchangers • Printed Circuit Heat Exchangers • Advantages and	
	Disadvantages of these Types and Scopes of Application	

ME0062-4D - Page 6 of 8

1230 - 1245	Break
1245 - 1345	<i>Heat Exchanger Costing</i> <i>Scoping</i> • <i>Quick-sizing</i> • <i>Correction Factors</i> • <i>Estimation of the Overall Heat</i> <i>Transfer Coefficient</i> • <i>Estimating Cost</i> • <i>ESDU Data</i> • <i>Logarithmic</i> <i>Interpolation</i> • <i>Worked Example</i>
1345 - 1420	<i>Multipass Heat Exchanger</i> Worked Examples in Determining Heat Transfer Rate With and Without Effects of Fouling
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3

Day 3		
0730 – 0830	Problem Session Numerical Exercise on Multipass Heat Exchangers	
0830 - 0930	Cooling of an Automotive/Industrial Compact Radiator Determination of Overall Heat Transfer Coefficient	
0930 - 0945	Break	
0945 - 1030	<i>Effectiveness/NTU Method for Heat Exchanger Analysis</i> <i>Heat Transfer Effectiveness, Capacity Ratios</i> • <i>Worked Examples</i>	
1030 - 1130	Upper Limit of Heat Transfer in a Heat ExchangerCounter Flow Heat Exchanger• Effectiveness as a Function of NTU• WorkedExamples	
1130 - 1230	Shell & Tube Heat ExchangersHeat Exchanger InspectionScopeConstructionTEMA Standards andTerminologiesFluid AllocationDesign Problems, Design EnhancementExamples	
1230 - 1245	Break	
1245 - 1345	<i>Heat Exchanger Maintenance</i> <i>Planning</i> • <i>Precautions Required</i> • <i>Plugging</i> • <i>Ferruling</i> • <i>Sleeving</i> • <i>Shell</i> <i>Side Repairs</i> • <i>Retubing</i>	
1345 – 1420	Fouling Control of Heat Exchanger	
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow	
1430	Lunch & End of Day Three	

Day 4

0730 - 0930	Heat Exchanger Inspection Techniques	
	Visual, NDT • Common Failures • Inspection Tools • Inspection Codes	
0930 - 0945	Break	
0945 - 1030	Design of Shell & Tube Heat Exchangers	
	Achievement of Duty Required • Developing Design Envelope • Choosing the	
	Best Design • Pressure Drop and Tube Vibration Issues	
1030 - 1130	Worked Example on a Multipass Heat Exchanger	
	Determination of Heat Transfer and Outlet Stream Temperatures	
1130 - 1230	New Technology in Heat Exchanger	

ME0062-4D - Page 7 of 8

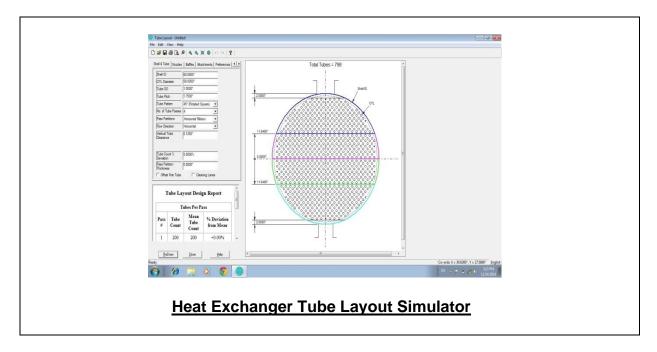

1230 - 1245	Break
1245 - 1345	Final Discussions
	Course Conclusion
1345 - 1400	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Course Topics that were Covered During the Course
1400 - 1415	POST-TEST
1415 - 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the simulator "Heat Exchanger Tube Layout".
