#### Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

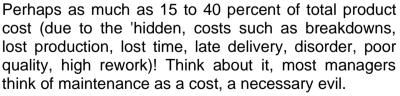

Recent competitive trends have been pushing companies to reconsider the impact and importance of equipment availability. utilization increasing resource utilization, and increasing quality responsiveness of maintenance services in achieving World Class Status to meet world competition.

It has been estimated that of the over 600 billion dollars per year spent on maintenance, more than one third 200 billion dollars is wasted! Wasted due to poor management of resources, poor measurement and control of labor, material, capital! Not only that: Maintenance costs are higher than managers realize, because although they think the costs of doing maintenance are high, they don't often realize the costs of not doing maintenance right are even higher.

Costs are something to be minimized, even eliminated, if possible. But everyone knows you can't eliminate maintenance. The plant would come to a screeching halt. No, you must optimize the maintenance function, not minimize it. But to optimize maintenance means you must develop more meaningful, contribution-based measurements.

This comprehensive course will show you how to initiate and sustain a process of maintenance performance improvement; a process in which maintenance is recognized as critical to the overall production strategy by which your plant provides the product to the customer at a quality he wants and a price they are willing to pay.

This course is devoted to helping you understand how to improve performance through more effective measurement systems such as Auditing and Benchmarking. Here's a road map to get you from where you are to where you need to be! Here are some practical guidelines, tools, and techniques that will enable maintenance and production managers to develop consistent, useful, and relevant measures of performance as they strive for 'world class' status.

The course includes an e-book entitled "Maintenance Benchmarking and Best Practices", published by McGraw-Hill Professional, which will be given to the participants to help them appreciate the principles presented in the course.
