

# COURSE OVERVIEW ME0217-3D Turbine: Major Inspection & Overhaul

Course Title

Turbine: Major Inspection & Overhaul

### Course Date/Venue

November 04-06, 2024/ Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

(18 PDHs)

AWAR

Course Reference ME0217-3D

Course Duration/Credits Three days/1.8 CEUs/18 PDHs

### **Course Description**

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course is designed to provide delegates with a detailed and up-to-date knowledge on turbine overhauling. It covers gas and steam turbines including their design and construction range; maintenance and overhaul considerations; proper maintenance, overhaul differences and the needs for internal, external turbine parts and supporting systems; major turbine components; major external component characteristics; failure mechanisms; equipment monitoring; operations and training infrastructure; and steam turbine availability.

At the completion of the course, participants will be able to carry out scheduled maintenance and overhaul practices; inspect combustion; apply risk based methodologies, reliability centered or condition based maintenance; identify the issues with the new steam turbine technologies and applications; recognize associate jobs with overhaul and inspections; repair strategy optimization for gas turbine based on equivalent operating hour (EOH) analysis; and perform and maintain continuous improvement of gas turbines.

ME0217-3D-11-24|Rev.10|16 July 2024

### Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply systematic techniques on turbine overhauling
- Describe gas and steam turbines including their design and construction range
- Discuss maintenance and overhaul considerations covering steam turbine design/construction, arrangements, application and industry, gas quality, steam quality, plant infrastructure from monitoring, operations and maintenance
- Recognize the proper maintenance, overhaul differences and the needs for internal, external turbine parts and supporting systems
- Identify major turbine components comprising of steam/gas, major internal components, rotating blading and discs, shafts, rotors, bearings and seals, stationary blading and diagrams, shells, blade rings and casings
- Enumerate the major external components and supporting systems
- Describe turbine component characteristics and failure mechanisms
- Implement equipment monitoring, operations and training infrastructure
- Identify and maintain steam turbine availability and share failure experience
- Determine steam turbine availability and failure experience
- Carryout scheduled maintenance and overhaul practices as well as the annual and multiple year steam turbine maintenance frequencies and task
- Inspect combustion and discuss the approaches, methodologies and criteria for establishing longer time intervals between major overhauls as well as management directed intervals, process and criticality driven intervals and turbine manufacturer driven intervals
- Discuss risk based methodologies, reliability centered or condition based maintenance
- Identify the issues with the new steam turbine technologies and applications
- Issue tender documents for major overhaul and inspect gas turbines
- Recognize associate jobs with overhaul and inspections and repair strategy optimization for gas turbine based on equivalent operating hour (EOH) analysis
- Perform and maintain continuous improvement of gas turbines

## Exclusive Smart Training Kit - H-STK<sup>®</sup>

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK<sup>®</sup>). The H-STK<sup>®</sup> consists of a comprehensive set of technical content which includes electronic version of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a Tablet PC.

ME0217-3D-11-24|Rev.10|16 July 2024

#### Who Should Attend

This course covers systematic techniques and methodologies on turbine overhauling for mechanical engineers, supervisors, foremen, team leaders, plant operators and other technical staff who are responsible for the day-to-day operations of a gas turbine. Maintenance personnel who are involved in the troubleshooting of operational problems will also find this course extremely useful.

#### Training Methodology

All our Courses are including Hands-on Practical Sessions using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures20% Practical Workshops & Work Presentations30% Hands-on Practical Exercises & Case Studies20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

#### Course Fee

**US\$ 3,750** per Delegate + **VAT**. This rate includes H-STK<sup>®</sup> (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

#### **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

ME0217-3D - Page 3 of 8

### Course Certificate

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

### **Certificate Accreditations**

Certificates are accredited by the following international accreditation organizations: -

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **1.8 CEUs** (Continuing Education Units) or **18 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

### Course Instructor

This course will be conducted by the following instructor. However, we have the right to change the course instructor prior to the course date and inform participants accordingly:

Mr. Mohamed Refaat, MSc, BSc, is a Senior Mechanical & Maintenance Engineer with almost 30 years of extensive experience in Rotating Equipment and Machinery including Pumps, Compressors, Turbines, Motors, Turbo-expanders, Gears, etc. His wide experience also covers Centrifugal Compressor & Steam Turbine, Centrifugal Pump, Pump Technology, Gas Turbine Technology, Heat Exchanger, Turbines & Motors, Variable Speed Drives, Seals, Control Valves, Advanced Valve Technology, Dry Seal, Fired Heaters, Air Coolers, Crude Desalter, Process Vessels & Valves, Industrial Equipment & Rotating Machinery, Mechanical Engineering, Mechanical Equipment

& Turbomachinery, Piping, Pipelines, Valves, Lubrication Technology, Vibration Analysis, Power System Hydraulics, Security Detection Systems **Plant** Equipment, Troubleshooting Process Operation, Process **Operations**. & Maintenance Management Best Practices, Rotating Equipment Reliability Optimization, Practical Machinery Vibration, Vibration Techniques, Effective Reliability Maintenance. Excellence in Maintenance & Reliability Management, Preventive & Predictive Maintenance, Machinery Failure Analysis (RCFA), Reliability Optimization & Continuous Improvement, Maintenance Planning, Scheduling & Work Control, Maintenance Management Strategy, Mechanical & Rotating Equipment Troubleshooting, Preventive Maintenance, Predictive Maintenance, Reliability Centered Maintenance (RCM), Condition Based Monitoring (CBM), FMEA and Troubleshooting of machinery and rotating equipment including turbines, bearings, compressors, pumps etc. He is currently the Mechanical Maintenance Section Head of the Arab Petroleum Pipelines Company where he is in charge of planning, scheduling & managing the execution of preventive & corrective mechanical maintenance activities for all equipment. He is responsible for executing the scheduled inspections & major overhauls for gas turbines, valves & pumps, carrying out offline vibration monitoring plans, troubleshooting, fault diagnosing & investigating failures of machinery.

During his career life, Mr. Mohamed was able to modify the gas turbines self cleansing system to improve its maintainability and extend the air filters' lifetime. He was responsible for defining & updating the equipment codes and parameters for replacing the old **CMMS** with **MAXIMO**. He also worked as the Operations Supervisor wherein he was closely involved with the operation of the crude oil internal **pipeline** system between the tankers and tank farm, operation & control of the booster pumps for pumping crude oil for main pipelines and the development & implementation of the plans & procedures for draining the main terminal internal lines for maintenance purposes. He also held the position of Measurement Engineer where he was responsible for the crude oil custody transfer, performing loss control analysis and operating the crude oil automatic sampler & related equipment. Prior to that, he was the Design Engineer responsible for the design phase of the Truck Mixer Manufacturing Project of the Mechanical Design Department.

Mr. Refaat has **Master** and **Bachelor** degrees in **Mechanical Engineering** and a General Certificate of Education (GCE) from the University of London, UK. Further, he is a Certified Instructor/Trainer, a Certified Internal Verifier/Assessor/Trainer by the Institute of Leadership & Management (ILM) and a member of the Engineering Syndicate of Egypt. He has further delivered numerous training, courses, workshops, seminars and conferences worldwide.

ME0217-3D - Page 5 of 8

# Course Program

The following program is planned for this course. However, the course instructor may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1:	Monday 04 <sup>th</sup> of November 2024
0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0900	Introduction
	Gas & Steam Turbines • Design & Construction Range
	Maintenance & Overhaul Considerations
0900 - 0930	Steam Turbine Design/Construction
	Industry • Gas Quality • Steam Quality • Plant Infrastructure from
	Monitoring • Operations & Maintenance
0930 - 0945	Break
0945 – 1100	Maintenance, Overhaul Differences & Needs for Internal & External
	Turbine Parts & Supporting Systems
	Major Turbine Components
1100 1120	Steam/Gas • Major Internal Components • Rotating Blading & Discs • Shafts
1100 – 1130	• Rotors • Bearings & Seals • Stationary Blading & Diagrams • Shells •
	Blade Rings & Casings
	Major External Components/Supporting Systems
	Main Stop • Trip & Throttle • Intercept Valves • Governor/Control Valves •
1130 - 1215	Admission • Extraction, Steam & Drain Connections • Overspeed Connection
	System • Lubrication System • Electrohydraulic System • Water/Steam
	Chemistry Controls
1215 – 1230	Break
	Turbine Component Characteristics & Failure Mechanisms
	Detectable Problems • Gas Path Analysis • Turbine Blade Distress •
1230 – 1300	Compressor Fouling • Combustor Distress & Plugged Fuel Nozzles •
	Foreign/Domestic Object Damage • Worn Air/Oil Seals • Fuel Control
	Problems
	Equipment Monitoring
1300 - 1330	Water & Steam Purity Monitoring • Water Induction Monitoring • Condition
	Monitoring   Management
1330 - 1420	<b>Operations &amp; Training Infrastructure</b>
1420 – 1430	Recap
	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Topics that were Discussed Today & Advise Them of the Topics to be
	Discussed Tomorrow
1430	Lunch & End of Day One

Day 2:	Tuesday 05 <sup>th</sup> of November 2024
0730 – 0830	Steam Turbine Availability & Failure Experience
0830 - 0930	Scheduled Maintenance & Overhaul Practices (US, European, Japanese)
0930 - 0945	Break
0945 - 1100	Annual Steam Turbine Maintenance Frequencies & Tasks (US, European, Japanese)

ME0217-3D - Page 6 of 8

1100 – 1130	Multiple-Year Steam Turbine Maintenance Frequencies & Tasks (US, European, Japanese)
1130 - 1215	<i>Combustion Inspection</i> <i>Removing the Parts</i> • <i>Turbine Compartment</i> • <i>Opening the Combustion Cans</i> • <i>Re-Installation of the Parts</i>
1215 – 1230	Break
1230 - 1300	Case StudiesGas Turbine Inspection • Inspection Frequency • Combustion Inspection •Hot/Gas Path Inspection • Major Inspection
1300 - 1330	Approaches/Methodologies/Criteria for Establishing Longer Time Intervals between Major Overhauls
1330 - 1420	Management Directed Intervals
1420 – 1430	<b>Recap</b> Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today & Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3:	Wednesday 06 <sup>th</sup> of November 2024
0730 - 0830	Process & Criticality Driven Intervals
0830 - 0930	Turbine Manufacturer's Intervals
0930 - 0945	Break
0945 - 1100	Risk-Based Methodologies
1100 – 1130	Reliability Centered or Condition Based Maintenance
1130 - 1215	Issues with New Steam Turbine Technologies & Applications
1215 – 1230	Break
1230 - 1300	Tender Documents for Major Overhaul, Inspection Gas Turbines &
	Other
	Associated Jobs with Overhaul & Inspections, Repair Strategy
1300 - 1330	Optimization for Gas Turbine Based on Equivalent Operating Hour
	(EOH) Analysis
1330 - 1345	Gas Turbines Performance & Maintenance Continuous Improvement
	Course Conclusion
1345 - 1400	Using this Course Overview, the Instructor(s) will Brief Participants about the
	Course Topics that were Covered During the Course
1400 - 1415	POST-TEST
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

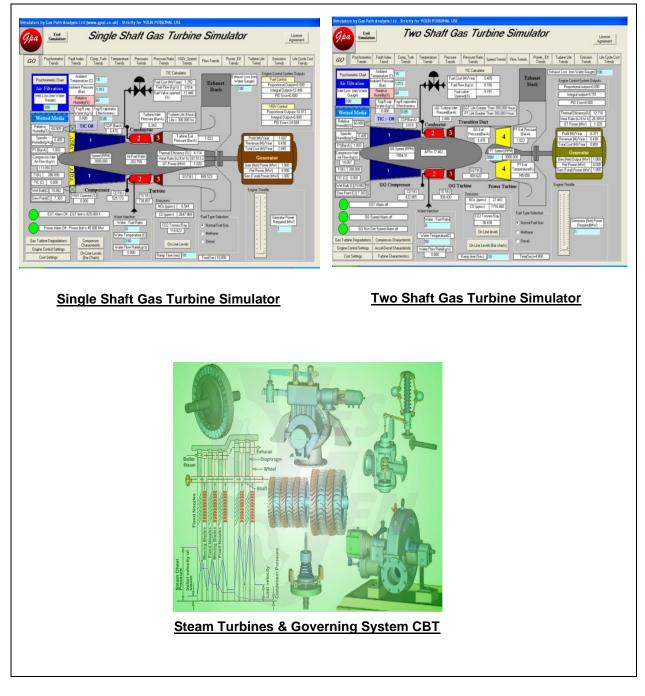

ME0217-3D - Page 7 of 8

### Simulator (Hands-on Practical Sessions)

Practical session will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using the "Single Shaft Gas Turbine Simulator", "Two Shaft Gas Turbine Simulator", and "Steam Turbines & Governing System CBT".

### Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: mari1@haward.org
