

### COURSE OVERVIEW RE0230 ISO 55001 Asset Management Awareness

#### Course Title

ISO 55001 Asset Management Awareness

#### **Course Date/Venue**

August 12-16, 2024/Fujairah Meeting Room, Grand Millennium Al Wahda Hotel, Abu Dhabi, UAE

Course Reference RE0230

Course Duration/Credits Four days/3.0 CEUs/30 PDHs

#### Course Description

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

When properly executed, Physical Asset Management can significantly impact an organization's bottom line by reducing maintenance costs, increasing the economic life of capital equipment, reducing company liability, increasing the reliability of systems and components, and reducing the number of systems and components.

This course will provide participants with the tools and methodologies to achieve maintenance excellence in their organization. The course has been designed to help managers care for their assets efficiently and effectively through sound and timely decision-making.

Further, the course will also discuss the ISO 55000 including its elements, structure and requirements for an asset management system; the benefits of adopting ISO 55000 and how it align with other management systems; the roadmap to achieve certification and subsequent business improvement; the various HAZOP approaches including and risk-based inspection; the total productive maintenance (TPM), people-centric maintenance and quality improvement; the methodologies covering asset management of projects, quantum leaps in process improvement and supplier partnering program (SPP); and the failure process and age versus reliability patterns.

#### RE0230-Page 1 of 8

During this interactive course, participants will learn to optimize human and asset performance by focusing on behavior and results; carryout balance scorecards, benchmarking and key performance indicators; identify the basic economics and the aspects of discounted cash flow used in capital equipment replacement analysis; apply present-value calculation and recognize the effects of inflation in the analysis; estimate the interest rate appropriate for discounting; calculate the equivalent annual cost (EAC) and minimize life cycle cost; recognize basic statistics and the problem with uncertainty; optimize maintenance and replacement decisions covering network system reliability and maintenance tasks; employ reliability centered maintenance (RCM); and optimize condition based maintenance decisions.

#### **Course Objectives**

Upon the successful completion of this course, each participant will be able to:

- Apply a proper physical asset management system in accordance with the ISO 55000/55001 standards in order to achieve a maintenance excellence position
- Discuss ISO 55000 including its elements, structure and requirements for an asset management system
- Explain the benefits of adopting ISO 55000 and how it align with other management systems
- Illustrate roadmap to achieve certification and subsequent business improvement
- Manage risk and apply the various approaches including HAZOP and risk-based inspection
- Manage reliability through people, total productive maintenance (TPM), peoplecentric maintenance and quality improvement
- Optimize methodologies covering asset management of projects, quantum leaps in process improvement and supplier partnering program (SPP)
- Define failure and identify failure process and age versus reliability patterns
- Optimize RCM results through root cause failure analysis (RCFA) and life cycle decisions
- Optimize human and asset performance by focusing on behavior and results
- Carryout balance score cards, benchmarking and key performance indicators
- Discuss basic economics and the aspects of discounted cash flow used in capital equipment replacement analysis
- Apply present-value calculation and identify the effects of inflation in the analysis
- Estimate the interest rate appropriate for discounting, calculate the equivalent annual cost (EAC) and minimize life cycle cost
- Recognize basic statistics and the problem with uncertainty
- Optimize maintenance and replacement decisions covering network system reliability and maintenance tasks
- Employ reliability centered maintenance (RCM) and optimize condition based maintenance decisions

### Exclusive Smart Training Kit - H-STK<sup>®</sup>

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK<sup>®</sup>). The H-STK<sup>®</sup> consists of a comprehensive set of technical content which includes electronic version of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

#### Who Should Attend

This course provides an overview of all significant aspects and considerations of physical asset management for maintenance excellence for operations and maintenance staff, engineers, managers of plant operations, facility managers or maintenance professionals who are responsible for maintaining and managing the physical equipment assets of his plant as well as those who represent large facilities and plants from industries such as mining, oil and gas, pulp and paper, utilities, primary metals and heavy manufacturing. The course is a must for those incharge of implementing a physical asset management system in accordance with the ISO 55000/55001 standards.

#### Training Methodology

All our Courses are including Hands-on Practical Sessions using equipment, Stateof-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

#### Course Fee

**US\$ 5,500** per Delegate + **VAT**. This rate includes H-STK<sup>®</sup> (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

#### **Accommodation**

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

RE0230-Page 3 of 8

#### Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

# USA International Association for Continuing Education and Training (IACET)

Haward Technology is an Authorized Training Provider by the International Association for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, Virginia 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 1-2013 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 1-2013 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Association for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

## • BAC

#### British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

#### Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Karl Thanasis, PEng, MSc, MBA, BSc, is Senior Mechanical & Maintenance Engineer with over 30 years of extensive industrial experience. His wide expertise includes Piping & Pipeline, Maintenance, Repair, Shutdown, Turnaround & Outages, Maintenance & Reliability Management, Mechanical Maintenance Planning, Scheduling & Work Control, Advanced Techniques in Maintenance Management, Predictive & Preventive Maintenance, Maintenance & Operation Cost Reduction Techniques, Reliability

Centered Maintenance (RCM), Machinery Failure Analysis, Rotating Equipment Reliability Optimization & Continuous Improvement, Material Cataloguing, Mechanical & Rotating Equipment Troubleshooting & Maintenance, Root Cause Analysis & Reliability Improvement, Condition Monitoring, Root Cause Failure Analysis (RCFA), Steam Generation, Steam Turbines, Power Generator Plants, Gas Turbines, Combined Cycle Plants, Boilers, Process Fired Heaters, Air Preheaters, Induced Draft Fans, All Heaters Piping Work, Refractory Casting, Heater Fabrication, Thermal & Fired Heater Design, Heat Exchangers, Heat Transfer, Coolers, Power Plant Performance, Efficiency & Optimization, Storage Tank Design & Fabrication, Thermal Power Plant Management, Boiler & Steam System Management, Pump Operation & Maintenance, Chiller & Chiller Plant Design & Installation, Pressure Vessel, Safety Relief Valve Sizing & Selection, Valve Disassembling & Repair, Pressure Relief Devices (PSV), Hydraulic & Pneumatic Maintenance, Advanced Valve Technology, Pressure Vessel Design & Fabrication, Pumps, Turbo-Generator, Turbine Shaft Alignment, Lubrication, Mechanical Seals, Packing, Blowers, Bearing Installation, Couplings, Clutches and Gears. Further, he is also versed in Wastewater Treatment Technology, Networking System, Water Network Design, Industrial Water Treatment in Refineries & Petrochemical Plants, Piping System, Water Movement, Water Filtering, Mud Pumping, Sludge Treatment and Drying, Aerobic Process of Water Treatment that includes Aeration, Sedimentation and Chlorination Tanks. His strong background also includes Design and Sizing of all Waste Water Treatment Plant Associated Equipment such as Sludge Pumps, Filters, Metering Pumps, Aerators and Sludge Decanters.

Mr. Thanasis has acquired his thorough and practical experience as the **Project Manager**, **Plant Manager**, **Area Manager** - **Equipment Construction**, **Construction Superintendent**, **Project Engineer** and **Design Engineer**. His duties covered **Plant Preliminary Design**, **Plant Operation**, **Write-up** of **Capital Proposal**, **Investment Approval**, **Bid Evaluation**, **Technical Contract Write-up**, **Construction** and **Subcontractor Follow up**, **Lab Analysis**, **Sludge Drying** and **Management** of **Sludge Odor** and **Removal**. He has worked in various companies worldwide in the **USA**, **Germany**, **England** and **Greece**.

Mr. Thanasis is a **Registered Professional Engineer** in the **USA** and **Greece** and has a **Master** and **Bachelor** degrees in **Mechanical Engineering** with **Honours** from the **Purdue University** and **SIU** in **USA** respectively as well as an **MBA** from the **University of Phoenix** in **USA**. Further, he is a **Certified Internal Verifier/Trainer/Assessor** by the **Institute of Leadership & Management** (**ILM**) a **Certified Instructor/Trainer** and has delivered numerous trainings, courses, seminars, workshops and conferences worldwide.

RE0230-Page 5 of 8

#### Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1:	Monday, 12 <sup>th</sup> of August 2024
0800 - 0830	Registration & Coffee
0830 - 0845	Welcome & Introduction
0845 - 0900	PRE-TEST
0900 - 0930	Introduction to ISO 55000
	Provides an Overview of the ISO 55000 Suite of International Standards
0930 - 0945	Break
0945 – 1100	Overview of ISO 55001
	<i>Elements</i> • <i>Structure</i> • <i>Requirements for an Asset Management System</i>
1100 1220	Benefits of Adopting ISO 55000
1100 - 1250	The Business Case for ISO 55000 International Standards
1230 – 1245	Break
1245 – 1350	Achieving Certification
	Roadmap to Achieving Certification and Subsequent Business Improvement
1350 – 1400	Recap
1400	End of Day One

Day 2:	Tuesday, 13 <sup>th</sup> of August 2024
	Managing Risk
0800 - 0930	Risk and its Management – A Discussion of the Various Approaches Used,
	Including HAZOP and Risk-Based Inspection
0930 - 0945	Break
	Managing Risk (cont'd)
0945 – 1100	Risk and its Management – A Discussion of the Various Approaches Used,
	Including HAZOP and Risk-Based Inspection (cont'd)
	Managing Reliability through People
1100 – 1230	Total Productive Maintenance (TPM) – People-Centric Maintenance and
	Quality Improvement
1230 - 1245	Break
	Managing Reliability through People (cont'd)
1245 - 1350	Total Productive Maintenance (TPM) – People-Centric Maintenance and
	Quality Improvement (cont'd)
1350 - 1400	Recap
1400	End of Day Two

Day 3:	Wednesday, 14 <sup>th</sup> of August 2024
0800 - 0930	Optimizing Methodologies
	Asset Management of Projects
0930 - 0945	Break
0945 - 1100	Optimizing Methodologies (cont'd)
	Quantum Leaps in Process Improvement – The Ten Essential Requirements for
	DESIGN and RAM (Reliability, Availability & Maintainability) • Supplier
	Partnering Programme (SPP)
1100 – 1230	Optimizing Methodologies (cont'd)
	Definition of Failure • The Failure Process • Age versus Reliability Patterns

RE0230-Page 6 of 8

1230 – 1245	Break
1245 - 1350	<i>Optimizing Methodologies (cont'd)</i> <i>Root Cause Failure Analysis (RCFA): Optimizing RCM Results</i> • <i>Optimizing Life Cycle Decisions</i>
1350 – 1400	Recap
1400	End of Day Three

Day 4:	Thursday, 15 <sup>th</sup> of August 2024
0800 – 0930	Optimizing Human & Asset Performance by Focusing on Behaviour &
	Results
	Taking Stock of your Organization: Balanced Score Cards, Benchmarking and
	Key Performance Indicators
0930 - 0945	Break
	Basic Economics
0945 - 1100	Aspects of Discounted Cash Flow used in Capital Equipment Replacement
	Analysis • Present-Value Calculations • The Effects of Inflation in the
	Analysis • Estimating the Interest Rate Appropriate for Discounting
1100 1220	Basic Economics (cont'd)
1100 - 1230	<i>Calculating the Equivalent Annual Cost (EAC)</i> • <i>Minimizing Life Cycle Cost</i>
1230 – 1245	Break
1245 - 1350	Basic Statistics
	The Problem with Uncertainty • Dealing with Censored Data – Weibull
	Analysis, etc. • Where do you Place your Maintenance Efforts?
1350 – 1400	Recap
1400	End of Day Four

Day 5:	Friday, 17 <sup>th</sup> of August 2024
0800 - 0900	<b>Optimizing Maintenance &amp; Replacement Decisions</b>
	Network System Reliability • Maintenance Tasks
0900 - 1000	Reliability Centered Maintenance (RCM)
	RCM – The Analytical Decision Logic • Is RCM the Right Tool for you? •
	What can RCM Achieve? • What does it take to Implement RCM? • Reasons
	for the Failure of RCM • Capability Driven RCM
1000 - 1005	Break
1005 – 1100	Group Exercise
	An Opportunity to Apply the Theory of RCM to Practical Items of Plant
1100 - 1130	<b>Optimizing Condition Based Maintenance Decisions</b>
	Optimizing Time Based Maintenance • Getting the Most Out of your
	Equipment Before Repair Time
1130 – 1145	Course Conclusion
1145 – 1200	POST-TEST
1200	End of Course
