

COURSE OVERVIEW HE1893 Causal Reasoning Investigation

Course Title

Causal Reasoning Investigation

Course Date/Venue

Session 1: August 14-18, 2024/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

Session 2: October 20-24, 2024/SAS

Meeting Room, Holiday Inn

Muscat al Seeb, an IHG Hotel,

Muscat, Oman

Course Reference

HE1893

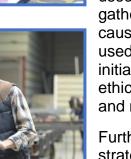

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

This course is designed to provide participants with a detailed and up-to-date overview of Causal Reasoning Investigation. It covers the principles and methodologies used in causal investigation focusing on logic, evidence gathering and hypothesis testing; the different types of causes and the various causal models and frameworks used to structure investigations; and the steps for initiating a causal reasoning investigation, address ethical considerations in investigations and recognizing and mitigating biases in causal reasoning.

Further, the course will also discuss the data collection strategies, analyzing data for causalities and using technology in investigations; developing and prioritizing hypotheses based on available data and causal reasoning principles; the methods for testing hypotheses through experiments, simulations or further data analysis; the best practices for documenting investigative findings, analyses and the rationale behind identified causes; creating and using fishbone diagrams (Ishikawa) for identifying potential causes of a problem; and constructing and analyzing fault trees to identify root causes and contributing factors of failures or events.

During this interactive course, participants will learn the Bow-Tie analysis, comparative analysis techniques and scenario analysis; the causality in complex systems including systemic interactions and emergent behaviors; the counterfactual reasoning and its application in understanding how different actions might have changed outcomes; investigating human factors and organizational behaviors as causes in events including error analysis and cultural assessments; the legal and regulatory implications of causal findings including liability and compliance issues; using causal reasoning for predictive purposes including risk assessment and prevention strategies; designing an investigation plan that efficiently leads to identifying root causes and contributing factors; the appropriate strategies for communicating investigation findings effectively to different audiences including report writing and presentation skills; translating investigation findings into actionable corrective and preventive measures; the procedures for monitoring the effectiveness of implemented actions and conducting follow-up investigations if necessary; and developing individual and team skills in causal reasoning and investigation.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain an in-depth knowledge on casual reasoning investigation
- Discuss causal reasoning concepts including the principles and methodologies used in causal investigation focusing on logic, evidence gathering and hypothesis testing
- Identify the different types of causes as well as the various causal models and frameworks used to structure investigations
- Implement steps for initiating a causal reasoning investigation, address ethical considerations in investigations and recognize and mitigate biases in causal reasoning
- Carryout data collection strategies, analyzing data for causalities and using technology in investigations
- Develop and prioritize hypotheses based on available data and causal reasoning principles
- Establish methods for testing hypotheses through experiments, simulations or further data analysis
- Apply best practices for documenting investigative findings, analyses and the rationale behind identified causes
- · Create and use fishbone diagrams (Ishikawa) for identifying potential causes of a problem
- Construct and analyze fault trees to identify root causes and contributing factors of failures or events
- Apply Bow-Tie analysis, comparative analysis techniques and scenario analysis
- · Recognize causality in complex systems including systemic interactions and emergent behaviors
- Explore counterfactual reasoning and its application in understanding how different actions might have changed outcomes

- Investigate human factors and organizational behaviors as causes in events including error analysis and cultural assessments
- Recognize the legal and regulatory implications of causal findings including liability and compliance issues
- Use causal reasoning for predictive purposes including risk assessment and prevention strategies
- · Design an investigation plan that efficiently leads to identifying root causes and contributing factors
- Employ appropriate strategies for communicating investigation findings effectively to different audiences including report writing and presentation skills
- Translate investigation findings into actionable corrective and preventive measures
- Establish procedures for monitoring the effectiveness of implemented actions and conducting follow-up investigations if necessary
- Develop individual and team skills in causal reasoning and investigation

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes electronic version of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a Tablet PC.

Who Should Attend

This course provides an overview of all significant aspect and considerations of causal reasoning investigation for those who are responsible for others in the workplace such as managers, engineers, supervisors, team leaders, foremen and junior production operation staff. Further, the course is suitable for all HSE, fire and safety staff.

Training Methodology

All our Courses are including Hands-on Practical Sessions using equipment, Stateof-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

30% Lectures

20% Practical Workshops & Work Presentations

30% Hands-on Practical Exercises & Case Studies

20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Fee

US\$ 5,500 per Delegate + VAT. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Attalla Ersan, PEng, MSc, BSc, is a Senior Engineer with over 35 years of extensive experience within the Project Safety Oil & Gas, Hydrocarbon and Petrochemical industries. His expertise widely covers the areas of HAZOP Facilitation, Hazardous Materials, Material Safety Data Sheets (MSDS), Hazardous Wastes, Hazards of Chemical Incidents, Shipping Configurations, Respiratory Protection, Protective Clothing, Donning and Doffing Procedures,

Boiler & Steam System Management, Waste Heat Recovery, Boiler Plant Safety, Boiler Controls, Steam Distribution Systems, Steam Traps, Pollution Control, Cracked Gas Compressor, Reboilers, Sulphur Unit Air Blower, Steam Turbine, Distillation Columns, Gas Treatment, Waste & Water Treatment Units, Process Plant Operations, Process Plant Startup & Operating Procedure, Ethylene & Vinyl Chloride, Ethane Cracking Furnaces Operations, Ethylene & Polyethylene Operation, Acid Gas Treatment, Sulphur Recovery, EDC & VCM, Caustic Soda Storage, Debottle-necking, Loss Prevention, Process Operation, Safety Audits, Process Engineering, Root Cause Investigations, Pyrolysis Cracking, Gas Plant Commissioning, Loss Prevention Techniques, Occupational Hazards, Hot Tapping & Tie-Ins, Pre-Start-Up Safety Review (PSSR), Standard Operating Procedure (SOP), Emergency Operating Procedure (EOP), Permit to Work Systems (PTW), Hazard and Operability (HAZOP) Study, Process Hazards Analysis (PHA), Consequence Analysis Application, Gas Detectors Operation, Accident/Incident Investigation (Why Tree Method), Occupational Exposure Assessment, Fire Fighting & First Aid, Environmental Management, Basic Safety Awareness, Steam Cracking, Steam Generation, Binary Fractionators Operations, Tanks Farm & Metering Station Techniques, Gas Treatment, Sulphur Recovery Process Unit Operation, Permit to Work System and Emergency Response Planning. Further, he is also well-versed in Project Management, Human Resources Consultancy, Manpower Planning, Job Design & Evaluation, Recruitment, Training & Development and Leadership, Creative Problem Solving Skills, Work Ethic, Job Analysis Evaluation, Training & Development Needs, Bidding & Tendering, Technical Report Writing, Supervisory Leadership, Effective Communication Skills and Total Quality Management (TQM). He is currently the CEO of Ersan Petrokimya Teknoloji Company **Limited** wherein he is responsible for the design and operation of Biogas Process Plants.

During his career life, Mr. Ersan has gained his practical and field experience through his various significant positions and dedication as the **Policy**, **Organization & Manpower Development Head**, **Training & Development**, **Head**, **Ethylene Plant – Pyrolysis Furnace Engineer**, **Production Engineer**, Process Training Coordinator, Ethylene Plant Shift Supervisor, Ethylene Plant Panel & Fit Operator, Process Training & Development Coordinator, **Technical Consultant**, and **Instructor/Trainer** for Qatar Vinyl Company Limited and Qatar Petroleum Company (QAPCO).

Mr. Ersan is a Registered Professional Engineer and has a Master's degree of Education in Educational Training & Leadership and a Bachelor's degree of Petrochemical Engineering. Further, he is a Certified Instructor/Trainer and has delivered numerous trainings, courses, workshops, conferences and seminars internationally.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

usal Reasoning Concepts including sation
Principles & Methodologies Used in Evidence Gathering & Hypothesis
uses (Immediate, Contributing, Root ions
s & Frameworks Used to Structure as, Fault Tree Analysis & Bow-Tie
for Initiating a Causal Reasoning Problem, Setting Objectives &
dressing Ethical Considerations in g Biases in Causal Reasoning

Day 2

	•
0730 – 0830	Data Collection Strategies: Techniques for Collecting Data & Evidence that are Relevant to the Investigation including Interviews, Document Reviews &
	Site Inspections
0830 - 0930	Analyzing Data for Causality: Methods for Analyzing Collected Data to Identify Patterns, Anomalies & Potential Causes
0930 - 0945	Break
0945 - 1100	Using Technology in Investigations: Software & Technology Tools that can Aid in Data Collection, Analysis & Visualization of Causal Relationships
1100 – 1215	Developing Hypotheses: How to Develop & Prioritize Hypotheses Based on Available Data & Causal Reasoning Principles
1215 - 1230	Break
1230 – 1330	Testing Hypotheses: Methods for Testing Hypotheses through Experiments, Simulations or Further Data Analysis
1330 - 1420	Documenting Findings: Best Practices for Documenting Investigative Findings, Analyses & the Rationale Behind Identified Causes
1420 - 1430	Recap
1430	Lunch & End of Day Two

Day 3

0730 - 0830	Fishbone Diagrams (Ishikawa): How to Create & Use Fishbone Diagrams
	for Identifying Potential Causes of a Problem
0830 - 0930	Fault Tree Analysis (FTA): How to Construct & Analyze Fault Trees to
	Identify Root Causes & Contributing Factors of Failures or Events
0930 - 0945	Break
0945 - 1100	Bow-Tie Analysis: Bow-Tie Method for Visualizing Causal Pathways from
	Causes to Effects & Implementing Control Measures
1100 – 1215	Comparative Analysis Techniques: Techniques for Comparing Events or
	Issues with Similar Scenarios to Identify Common Causes & Contributing
	Factors
1215 - 1230	Break
1220 1220	Scenario Analysis: Using Scenario Analysis to Explore Different Causal
1230 – 1330	Chains & their Potential Outcomes
1330 – 1420	Workshop: Applying Causal Models: Participants Engage in Workshops
	Applying Causal Models to Hypothetical or Real-World Cases
1420 - 1430	Recap
1430	Lunch & End of Day Three

Day 4

Day 4	
0730 - 0830	Systemic Causality in Complex Systems: Understanding Causality in Complex Systems including Systemic Interactions and Emergent Behaviors
0830 - 0930	Counterfactual Reasoning: Counterfactual Reasoning & Its Application in Understanding How Different Actions Might have Changed Outcomes
0930 - 0945	Break
0945 - 1100	Causality in Human Factors & Organizational Behavior: Investigating Human Factors & Organizational Behaviors as Causes in Events including Error Analysis & Cultural Assessments
1100 – 1215	Legal & Regulatory Implications: The legal & Regulatory Implications of Causal Findings including Liability & Compliance Issues
1215 – 1230	Break
1230 - 1330	Predictive Causality: Using Causal Reasoning for Predictive Purposes including Risk Assessment & Prevention Strategies
1330 - 1420	Case Study Analysis: Group Analysis of Complex Case Studies Focusing on Applying Advanced Causal Reasoning Techniques
1420 - 1430	Recap
1430	Lunch & End of Day Four

Day 5

Day 0	
0730 - 0815	Designing Effective Investigation Plans: How to Design an Investigation Plan that Efficiently Leads to Identifying Root Causes & Contributing Factors
0815 - 0900	Communication & Reporting Results: Strategies for Communicating Investigation Findings Effectively to Different Audiences including Report Writing & Presentation Skills
0900 - 0915	Break
0915 – 1100	<i>Implementing Corrective & Preventive Actions:</i> Translating Investigation Findings into Actionable Corrective & Preventive Measures
1100 – 1230	Monitoring & Follow-up: Establishing Procedures for Monitoring the Effectiveness of Implemented Actions & Conducting Follow-Up Investigations if Necessary

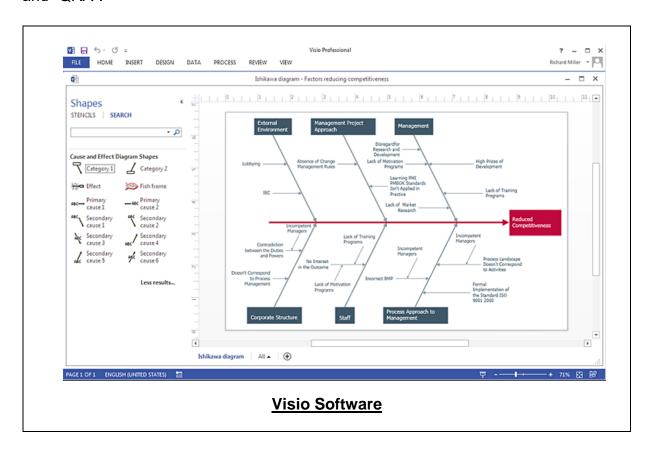

1230 - 1245	Break
1245 – 1345	Developing Causal Reasoning Skills: Exercises & Strategies for Further
	Developing Individual & Team Skills in Causal Reasoning & Investigation
1345 - 1400	Course Conclusion
1400 - 1415	POST-TEST
1415 – 1430	Presentation of Course Certificates
1430	Lunch & End of Course

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art simulators "Visio Software", "Mindview Software" and "QRA".

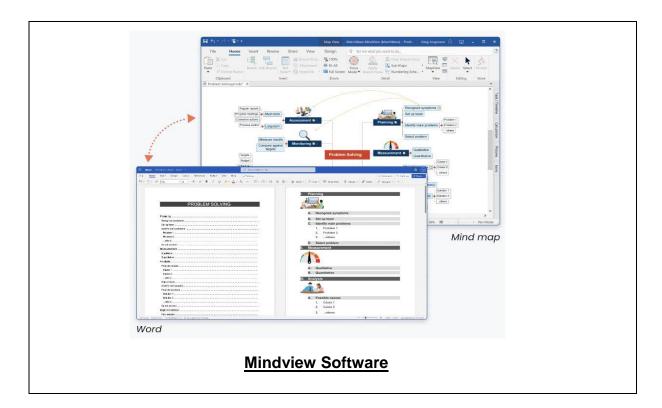

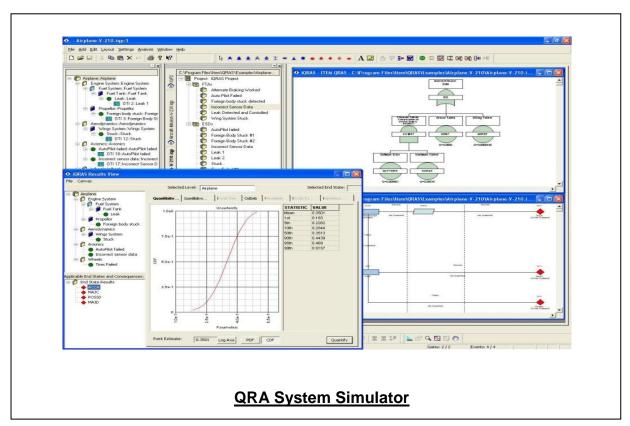

<u>Course Coordinator</u> Mari Nakintu, Tel: +971 2 30 91 714, Email: <u>mari1@haward.org</u>
