

COURSE OVERVIEW FE0771
Ultrasonic Testing Level-II Training & Certification
(ASNT, SNT-TC-1A)

Course Title

Ultrasonic Testing Level-II Training & Certification (ASNT, SNT-TC-1A)

Course Date/Venue

November 10-14, 2024/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

Course Reference

FE0771

Course Duration/Credits

Five days (40 hours)/4.0 CEUs/40 PDHs

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art equipment.

This course is designed to provide participants the theory lectures and practical training with a preliminary understanding of Ultrasonic Testing (UT) as per the ASNT Recommended Practice No. SNT-TC-1A for Personnel Qualification and Certification in Nondestructive Testing.

Ultrasonic Testing (UT) uses high frequency sound energy to conduct examinations and make measurements. Ultrasonic inspection can be used for flaw detection/evaluation, dimensional measurements, material characterization, and much more. Although there are a number of technologies employing ultrasound, the simplest explanation of what happens in this method is that sound energy is introduced via a transducer and propagates through the materials in the form of waves. When there is a discontinuity (such as a crack) in the wave path, part of the energy will be reflected back from the flaw surface.

The reflected wave signal is transformed into an electrical signal by the transducer and is displayed or recorded in a variety of ways. Both surface and subsurface defects can be detected making ultrasonics a volumetric testing method. Applications vary in complexity from very small, hand-held manual units to very large, sophisticated automated systems.

This method is used to inspect a variety of product forms including castings, forgings, and weldments. The structural steel, automotive, petrochemical, power generation, and aerospace industries are a few examples that utilize ultrasonic inspection.

This course provides a review of basic ultrasonic theory, evaluation of weldments, innovative techniques to detect and evaluate discontinuities, equipment and advanced standardization methods.

Sample Questions for general examinations are presented in the separate question booklets that can be obtained from ASNT International Service Center. Participants will further demonstrate familiarity with and ability to operate the necessary equipment for UT, record and analyse the resultant information to the degree required as well as test flawed specimen and component and analyse the results of NDT as part of the practical training.

At the completion of the course, participants will be appearing for a Level II exam. Each candidate will be a 'Certified ASNT NDT Level II in Ultrasonic Testing' upon successfully passing the examination with a minimum passing composite grade of at least 80 percent (%) which will be administered and graded by Haward Technology through its Certified ASNT Level-III instructors.

Course Objectives

Upon the successful completion of the course, each participant will be able to:-

- Get certified as a "Certified ASNT NDT Level II in Ultrasonic Testing"
- Review ultrasonic technique, principle of ultrasonic, equipment, testing techniques and standardization
- Evaluate base-material product forms that include ingots, plate, sheet, bar, rod, pipe, tubular products, forgings and castings
- Identify composite structures and other product forms as applicable - rubber, glass, etc.
- Evaluate weldments and apply welding processes and weld geometries
- Recognize the welding discontinuities, origin and typical orientation of discontinuities, response of discontinuities to ultrasound and applicable codes/standards
- Evaluate bonded structures through manufacturing processes, types of discontinuities, origin and typical orientation of discontinuities, response of discontinuities to ultrasound and applicable codes/standards
- Detect discontinuity and identify sensitivity to reflections, resolution, determination of discontinuity size, location of discontinuity
- Apply comparison procedures and object appraisal

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive "Haward Smart Training Kit" (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor's actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides an overview of all significant aspects and considerations of ultrasonic testing in accordance with the ASNT international standard for all engineers and other technical staff working in the field of welding technology and quality assurance of welded joints using ultrasonic testing and in order to investigate material with such technique.

Exam Eligibility & Structure

Exam candidates shall have the following minimum pre-requisites:-

All Participants of this course must have Level I in UT before they can attend this Level II course

Initial Training & Experience Levels			
Level	Training Hours	Minimum Hours in UT Method	Total Hours in NDT
I	40	210	400
II	40	630	1200

The experience shall consist of time at NDT Level I or equivalent. If a person is being qualified directly to NDT Level II with no time at NDT Level I, the experience (both Method and Total NDT) shall consist of the sum of the hours for NDT Level I and Level II and the training shall consist of the sum of the hours for NDT Level I and Level II.

Examinations Category & Criteria

Vision Examinations

- Near-Vision Acuity
 - This examination will ensure natural or corrected near-distance acuity in at least one eye such that the applicant is capable of reading a minimum of Jaeger Number 2 or equivalent type and size letter at the distance designated on the chart but not less than 12 inches (30.5 cm) or a standard Jaeger test chart. The ability to perceive an Ortho-Rater minimum of 8 or similar test pattern is also acceptable. This examination shall be administered annually.
- Color Contrast Differentiation
 - This examination will demonstrate the capability of distinguishing and differentiating contrast among colors or shades of gray used in the method as determined by the employer. This shall be conducted upon initial certification and at five-year intervals thereafter

General (Written)

- This examination will address the basic principles of the applicable method
- The NDT Level III will provide appropriate questions covering the applicable method to the degree required by the employer’s written practice
- The minimum number of examination questions that will be given is 40

Specific (Written)

- This examination will address the equipment, operating procedures and NDT techniques that the individual may encounter during specific assignments to the degree required by the employer's written practice
- The specific examination will also cover the specifications or codes and acceptance criteria used in the employer's NDT procedures
- The minimum number of examination questions that will be given is 20

Practical

- The candidate shall demonstrate familiarity with and ability to operate the necessary NDT equipment, record and analyse the resultant information to the degree required
- At least one flawed specimen or component shall be tested and the results of the NDT analysed by the candidate
- The description of the specimen, the NDT procedure including check points and the results of the examination shall be documented
- Proficiency shall be demonstrated in selecting and performing the applicable NDT technique within the method and in interpreting and evaluating the results on one or more specimens or machine problems approved by the NDT Level III. At least ten (10) different checkpoints requiring an understanding of NDT variables and the employer's procedural requirements will be included. The candidate shall detect all discontinuities and conditions specified by the NDT Level III

Note: While it is normal to score the practical on a percentile basis, practical examinations shall contain check points that failure to successfully complete will result in failure of the examination

Additional Criteria

All written examinations will be closed-book except that necessary data such as graphs, tables, specifications, procedures, codes, etc., may be provided during the examination. All questions are approved by the responsible NDT Level III.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Qualification Certificate(s)

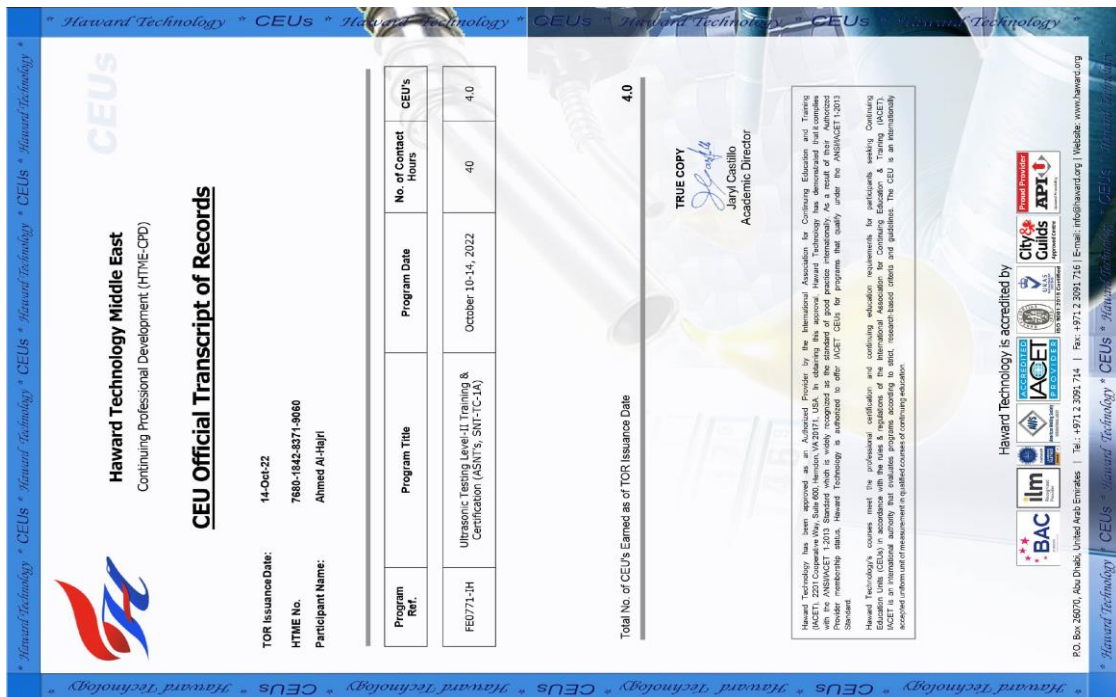

(1) Internationally recognized Qualification Certificates will be issued to participants who have successfully completed the course and passed the exam at the end of the course. Successful candidate will be certified as a “Certified ASNT NDT Level II in Ultrasonic Testing”. Qualification Certificate is valid for 5 years.

Sample of Certificates

The following are samples of the certificates that will be awarded to course participants:-

(2) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations:-

- 

The American Society for Nondestructive Testing (ASNT)

Haward Technology has certain instructors who are certified by **The American Society for Nondestructive Testing (ASNT)** and are authorized to conduct ASNT's certification programs for specific NDT methods. ASNT is the world's largest technical society for nondestructive testing (NDT) that provides a forum for exchange of NDT technical information, NDT educational materials and programs, and standards and services for the qualification and certification of NDT personnel.

- 

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **4.0 CEUs** (Continuing Education Units) or **40 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- 

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Luis Lopez is a **Senior Inspection Engineer** with extensive experience within the **Oil & Gas, Petrochemical and Refinery** industries. His expertise widely covers in the areas of **Thermography, Thermal Infrared Testing, Radiographic Film Interpretation, Visual Testing, Phased Array Ultrasonic Testing, Ultrasonic Testing, Magnetic Particle Testing, Liquid Penetrant Testing, Non-destructive Testing, NDT Methods & Applications, Electromagnetic Testing, Hydrostatic Leak Testing, Eddy Current Testing, Valve Inspection & Testing, Codes & Standards Interpretation, Corrosion Engineering, Corrosion & Metallurgy, Welding & Corrosion Engineering, Welding Metrology, International Welding Codes, Practical Welding Technology, Plastic Pipe Welding, Welding Inspection, Welding Defects Analysis, Welding Joints & Coating Inspection, Post Weld Heat Treatment, Hardness Testing, Welding Electrodes Monitoring & Control, Pipe Testing, Piping System, Steel Structures, Metals Casting, Crane Functional Testing & Load Testing, Hydrotesting, Pressure Testing Procedure, Pressure Equipment Calibration, Stream Inspection, Corrosion Evaluation, Casting Products Inspection and Raw Materials Inspection.** He is currently the **Senior NDT Instructor** of **SETE** wherein he is deeply involved in thermography, NDT qualification and certification of personnel.

During his career life, Mr. Lopez gained his practical and field experience through his various significant positions and dedication as the **Technical Manager, NDT Instructor, NDT Manager & Instructor, NDT Inspector, NDT Offshore Inspector & Quality Control, Phased Array Ultrasonic Technician and Radiographic Testing Technician** for various international companies such as the JP Inspections, Nova Inspection, NSD Services, Cotemar, UNISPEC Inspection and Ruiver.

Mr. Lopez holds a **Diploma in Professional Mechanical & Electrical Technician.** Further, he is a **Certified Instructor/Trainer, a Certified Internal Verifier/Assessor/Trainer** by the **Institute of Leadership and Management (ILM), a Certified ASNT-NDT Level III Inspector** in Infrared & Thermal Testing (**IR**), Liquid Penetrant Testing (**PT**), Magnetic Particle Testing (**MT**), Ultrasonic Testing (**UT**), Visual Testing (**VT**), Radiography Testing (**RT**), Leak Testing (**LT**), Electromagnetic Testing (**ET**), **Certified Welding Inspection & Metallurgy Professional (API 577)** and a **Certified AWS-CWI Welding Inspector.** He has further delivered numerous trainings, courses, workshops, seminars and conferences internationally.

Course Fee

US\$ 6,000 per Delegate + **VAT**. This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1: Sunday, 10th of November 2024

0730 – 0800	Registration & Coffee
0800 – 0815	Welcome & Introduction
0815 – 0830	PRE-TEST
0830 – 0930	Review of Ultrasonic Technique Course Principle of Ultrasonics • Equipment
0930 – 0945	Break
0945 – 1200	Review of Ultrasonic Technique Course (cont'd) Testing Techniques • Standardization
1200 – 1300	Lunch
1300 – 1400	Evaluation of Base-Material Product Forms Ingots • Plate & Sheet • Bar & Rod • Pipe & Tubular Products
1400 – 1415	Break
1415 – 1650	Evaluation of Base-Material Product Forms (cont'd) Forgings • Castings • Composite Structures • Other Product Forms as Applicable - Rubber, Glass, etc.
1650 – 1700	Recap
1700	Lunch & End of Day One

Day 2: Monday, 11th of November 2024

0730 – 0930	Evaluation of Weldments Welding Processes
0930 – 0945	Break
0945 – 1200	Evaluation of Weldments (cont'd) Weld Geometries
1200 – 1300	Lunch
1300 – 1400	Evaluation of Weldments (cont'd) Welding Discontinuities
1400 – 1415	Break
1415 – 1650	Evaluation of Weldments (cont'd) Origin and Typical Orientation of Discontinuities
1650 – 1700	Recap
1700	Lunch & of Day Two

Day 3: Tuesday, 12th of November 2024

0730 – 0930	<i>Evaluation of Weldments (cont'd) Response of Discontinuities to Ultrasound</i>
0930 – 0945	<i>Break</i>
0945 – 1200	<i>Evaluation of Weldments (cont'd) Applicable Codes/Standards</i>
1200 – 1300	<i>Lunch</i>
1300 – 1400	<i>Evaluation of Bonded Structures Manufacturing Processes</i>
1400 – 1415	<i>Break</i>
1415 – 1650	<i>Evaluation of Bonded Structures (cont'd) Types of Discontinuities</i>
1650 – 1700	<i>Recap</i>
1700	<i>Lunch & of Day Three</i>

Day 4: Wednesday, 13th of November 2024

0730 – 0930	<i>Evaluation of Bonded Structures (cont'd) Origin and Typical Orientation of Discontinuities • Response of Discontinuities to Ultrasound</i>
0930 – 0945	<i>Break</i>
0945 – 1200	<i>Evaluation of Bonded Structures (cont'd) Applicable Codes/Standards</i>
1200 – 1300	<i>Lunch</i>
1300 – 1400	<i>Discontinuity Detection Sensitivity to Reflections • Resolution</i>
1400 – 1415	<i>Break</i>
1415 – 1650	<i>Discontinuity Detection (cont'd) Determination of Discontinuity Size • Location of Discontinuity</i>
1650 – 1700	<i>Recap</i>
1700	<i>Lunch & of Day Four</i>

Day 5: Thursday, 14th of November 2024

0730 – 0830	<i>Evaluation Comparison Procedures • Object Appraisal</i>
0830 – 0845	<i>Break</i>
0845 – 0900	<i>Course Conclusion</i>
0900 – 1030	<i>Theoretical Examination</i>
1030 – 1200	<i>Theoretical Examination (cont'd)</i>
1200 – 1300	<i>Lunch</i>
1300 – 1500	<i>Practical Examination</i>
1500 – 1515	<i>Break</i>
1515 – 1600	<i>Practical Examination (cont'd)</i>
1645 – 1700	<i>Presentation of Course Certificates</i>
1700	<i>Lunch & of Course</i>

Practical Sessions

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will carryout NDT inspection using our “Ultrasonic Testing (UT) Equipment” and our specifically designed flawed specimen test components.

Ultrasonic Testing (UT) Equipment

Ultrasonic Testing Package USM 36

Flawed Specimen Test Components
