

COURSE OVERVIEW HE1170
Certified Safety Professional (CSP®)
BCSP Exam Preparation Training

Course Title

Certified Safety Professional (CSP®) BCSP Exam Preparation Training

Course Reference

HE1170

Course Duration/Credits

Five Days/3.0 CEUs/30 PDHs

Course Date/Venue

Session(s)	Date	Venue
1	January 05-09, 2025	Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE
2	April 21-25, 2025	Ajman Meeting Room, Grand Millennium Al Wahda Hotel, Abu Dhabi, UAE
3	Jun 29-Jul 03, 2025	Club B, Ramada Plaza By Wyndham Istanbul City Center, Istanbul, Turkey
4	October 05-09, 2025	Al Khobar Meeting Room, Hilton Garden Inn, Al Khobar, KSA

Course Description

This practical and highly-interactive course includes various practical sessions and exercises. Theory learnt will be applied using our state-of-the-art simulators.

BCSP awards the Certified Safety Professional to individuals who demonstrate competency and work full-time in a professional position where at least 50% of duties are safety program development and risk assessment devoted to the prevention of harm to individuals in the workplace environment. Whether your career goals include seeking a new position, moving up in your current organization or moving to private practice, you can accelerate your opportunities by achieving the Certified Safety Professional (CSP) certification.

The purpose of this course is to walk you through the process of applying for and taking the examination leading to the CSP certification. It provides you with in-depth information regarding the application process, examination process and the rules and procedures essential in retaining the CSP certification after you achieve it.

This course is designed to provide participants with a detailed and up-to-date overview of Certified Safety Professional (CSP®). It covers the core concepts of anatomy, physiology, chemistry, physics and mathematics; the statistics data and core research methodology concepts; the containment volumes, hazardous materials storage requirements and statistics from data sources; the management systems domain, including initial concepts on benchmarks and performance standards; the management leadership techniques, incident investigation techniques and management of change techniques; developing and implementing environmental, safety and health management systems; evaluating and analyzing survey data; and the risk management, hazard analysis methods and risk assessment process.

During this interactive course, participants will learn the behavior modification techniques; the costs and benefits of risk analysis; the administrative controls, engineering controls, chemical process safety management, fleet safety analysis and hazardous materials management; the emergency response planning, fire prevention and protection systems; the basic toxicology principles, ergonomics, and human factors principles; the environmental protection, pollution prevention methods and hazardous waste management practices; the legal issues, confidential information and ethics related to audits; and interpreting laws, regulations and BCSP code of ethics.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Get prepared for the next CSP® exam and have enough knowledge and skills to pass such exam to get the CSP® certification
- Discuss the core concepts of anatomy, physiology, chemistry, physics and mathematics
- Interpret statistics data and core research methodology concepts
- Calculate containment volumes and recognize hazardous materials storage requirements and statistics from data sources
- Discuss management systems domain, including initial concepts on benchmarks and performance standards
- Carryout management leadership techniques, incident investigation techniques and management of change techniques
- Develop and implement environmental, safety and health management systems as well as evaluate and analyze survey data
- Apply risk management, hazard analysis methods and risk assessment process
- Employ behavior modification techniques and identify the costs and benefits of risk analysis
- Carryout administrative controls, engineering controls, chemical process safety management, fleet safety analysis and hazardous materials management
- Employ emergency response planning, fire prevention and protection systems
- Explain the basic toxicology principles, ergonomics, and human factors principles
- Apply environmental protection, pollution prevention methods and hazardous waste management practices
- Discuss legal issues and apply protecting confidential information and ethics related to audits
- Interpret laws, regulations and BCSP code of ethics

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “Haward Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

The course provides an overview of all significant aspects and considerations of safety management for safety professionals seeking advanced certification in their field.

Course Fee

Dubai	US\$ 5,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Abu Dhabi	US\$ 5,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Istanbul	US\$ 6,000 per Delegate + VAT . This rate includes Participants Pack (Folder, Manual, Hand-outs, etc.), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Al Khobar	US\$ 5,500 per Delegate + VAT . This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Exam Fee

US\$ 700 per Delegate + **VAT**.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Eligibility Requirements

<p>Academic Requirement</p>	<p>Experience Requirement</p>	<p>BCSP-Approved Credential Requirement <i>(Applicant must hold one of the following credentials at the time they apply for the CSP)</i></p>
<p>All individuals applying for the CSP must have a bachelor's degree or higher in any field from an accredited institution or an associate in safety, health, or the environment. The associate degree must include at least four courses with at least 12 semester hours/18 quarter hours of study in the safety, health, or environmental domains covered in the ASP and CSP examination blueprints.</p>	<ul style="list-style-type: none"> • CSP candidates must have four years of professional safety experience to sit for the CSP exam. Professional safety experience must meet the following criteria to qualify: • Professional safety must be the primary function of the position. Collateral duties in safety are not counted. • The position's primary responsibility must be the prevention of harm to people, property, or the environment, rather than responsibility for responding to harmful events. • Professional safety functions must be at least 50% of the position duties. BCSP defines full-time as at least 35 hours per week. Part-time safety experience is allowed if the applicant has the equivalent of at least 900 hours of professional safety work during any year (75 hours per month or 18 hours per week) for which experience credit is sought • The position must be at a professional level. This is determined by evaluating the degree of professional charge by which there is a reliance of employees, employers or clients on the person's ability to identify, evaluate and control hazards through engineering and/or administrative approaches. • The position must have breadth of professional safety duties. This is determined by evaluating the variety of hazards about which the candidate must advise and the range of skills involved in recognizing, evaluating, and controlling hazards 	<ul style="list-style-type: none"> • Associate Safety Professional (ASP)** • Graduate Safety Practitioner (GSP) • Transitional Safety Practitioner (TSP)** • Certified Industrial Hygienist® (CIH®) • Chartered Member of the Institution of Occupational Safety and Health (CMIOSH)** • Canadian Registered Safety Professional (CRSP)** • Professional Certificate in Safety and Occupational Health, U.S. Army Combat Readiness Center (ACRC) (formerly "CP-12")** • Certified Safety Engineer (CSE), as administered by the State Administration of Work Safety (SAWS), People's Republic of China (PRC)** • Master in Occupational Safety and Health, International Training Centre of the International Labour Organization (ITC-ILO)** • NEBOSH National or International Diploma in Occupational Health and Safety** • Professional Member of the Singapore Institution of Safety Officers (SISO)** • Diploma/Certificate in Industrial Safety, as issued by the State Government Departments Boards of Technical Education, Government of India**

* Credential offered by BCSP

** Must meet eligibility requirements when pursuing CSP

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accredited by the following international accreditation organizations: -

- 
The International Accreditors for Continuing Education and Training (IACET- USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- 
British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor (s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Dr. John Petrus, PhD, MSc, BSc, is a Senior HSE Consultant with over 30 years of onshore & offshore experience within the Oil & Gas, Refinery and Petroleum industries. His wide experience covers in the areas of HAZOP & HAZID, HAZMAT & HAZCOM Storage & Disposal, As Low as Reasonably Practicable (ALARP), Process Hazard Analysis (PHA), Process Safety Management (PSM), Hazardous Materials & Chemicals Handling, Pollution Control, Environment, Health & Safety Management, Process Risk Analysis, Effective Tool Box Talks, Construction Sites Safety, HSSE Management System, HSSE Audit & Inspection, HSEQ Procedures, Authorized Gas Testing, Confined Space Entry & Rescue, Risk Management, Quantitative & Qualitative Risk Assessment, Working at Height, Firefighting Techniques, Fire & Gas Detection System, Fire Fighter & Fire Rescue, Fire Risk Assessment, HSE Industrial Practices, Manual Handling, Rigging Safety Rules, Machinery & Hydraulic Lifting Equipment, Warehouse Incidents & Accidents Reporting, Incident & Accident Investigation, Emergency Planning, Emergency Response & Crisis Management Operations, Waste Management Monitoring, Incident Command, Job Safety Analysis (JSA), Behavioral Based Safety (BBS). Further he is also well versed in Materials for Construction & Repair of Concrete, Concrete Structures & Building Rehabilitation, Reinforced Concrete Structures Protection, Building Construction Technology, Construction Operations & Civil Engineering Services, Building Management, Building Maintenance, Construction & Concrete Works, Construction Management, Construction Materials & Testing, Construction Safety, Predictive Maintenance in Construction, Construction & Facilities Development, Buildings & Diverse Plant Infrastructure, Planning & Monitoring the Progress & Quality of Work, Physical Planning & Operations, Rotating Machinery Principles & Applications, Rotating Equipment Selection, Operation, Maintenance, Inspection & Troubleshooting, Rotating Machine/Equipment in Industry, Control Valves & Actuators, Data Analytics for Managerial Decision Making, Business Process Analysis, Mapping & Modeling, Research Methods & Analysis, Statistical Data Needs Analysis, Oil & Gas Industry Business Environment & Competitive Intelligence Gathering & Analysis, Petroleum Economics & Risk Analysis, Certified Data Analysis.

During his career life, Dr. Petrus held significant positions and dedication as the **Executive Director, Senior Geoscience Advisor, Exploration Manager, Project Manager, Manager, HSE Engineer, Mechanical Engineer, Maintenance Engineer, Chief Geologist, Chief of Exploration, Chief of Geoscience, Senior Geosciences Engineer, Senior Explorationist, Senior Geologist, Geologist, Senior Geoscientist, Geomodeller, Geoscientist, CPR Editor, Resources Auditor, Project Leader, Technical Leader, Safety Supervisor, Team Leader, Senior HSE Consultant, Scientific Researcher and Senior Instructor/Trainer** from various international companies and universities such as the Dragon Oil Holding Plc., ENOC, MENA, ENI Group of Companies, Ocre Geoscience Services (OGS), Burren RPL, Ministry of Oil-Iraq, Eni Corporate University, Stanford University, European Universities, European Research Institutes, NorskHydro Oil Company, Oil E&P Companies, just to name a few.

Dr. Petrus has a **PhD in Geology and Tectonophysics and Master and Bachelor degrees in Earth Sciences** from the **Utrecht University, The Netherlands**. Further, he is a **Certified Instructor/Trainer, a Certified Trainer/Assessor/Internal Verifier** by the **Institute of Leadership & Management (ILM)**, a Secretary and Treasurer of Board of Directors of Multicultural Centre, Association Steunfonds SSH/SSR and Founding Member of Sfera Association. He has further published several scientific publications, journals, research papers and books and delivered numerous trainings, workshops, courses, seminars and conferences internationally.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0900	Welcome & Introduction Overview of CSP • Importance of Safety Professionals • Structure of the course
0900 - 0930	Domain 1: Advanced Science & Math Core Concepts: Anatomy, Physiology, Chemistry, Physics & Mathematics • Statistics for Interpreting Data
0930 - 0945	Break
0945 - 1115	Domain 1: Advanced Science & Math (cont'd) Core Research Methodology Concepts
1115 - 1230	Domain 1: Advanced Science & Math Practical Application Calculations: Containment Volumes, Hazardous Materials Storage Requirements, Statistics from Data Sources
1230 - 1245	Break
1245 - 1330	Domain 1: Advanced Science & Math Practical Application (cont'd) Hands-on Practice & Exercises
1330 - 1420	Domain 2: Management Systems Intro Overview of Management Systems Domain • Initial Concepts on Benchmarks & Performance Standards
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

Day 2

0730 - 0930	Domain 2: Management Systems Detailed Study Management Leadership Techniques, Incident Investigation Techniques, Management of Change Techniques
0930 - 0945	Break
0945 - 1145	Domain 2: Management Systems Detailed Study (cont'd) System Safety Techniques • Exercise on Root Cause Analysis
1145 - 1230	Domain 2: Practical Applications in Management Systems Developing & Implementing Environmental, Safety & Health Management Systems
1230 - 1245	Break
1245 - 1400	Domain 2: Practical Applications in Management Systems (cont'd) Evaluating & Analyzing Survey Data
1400 - 1420	Domain 3: Risk Management Introduction to Risk Management • Overview of Hazard Analysis Methods and Risk Assessment Process
1420 - 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3

0730 - 0930	Domain 3: Risk Management (cont'd) <i>Detailed Study: Behavior Modification Techniques, Costs & Benefits of Risk Analysis • Hands-on: Conducting Job Safety Analyses & Task Analyses</i>
0930 - 0945	Break
0945 - 1045	Domain 3: Risk Management (cont'd) <i>Group Discussion: Explaining Risk Management Options to Stakeholders</i>
1045 - 1230	Domain 4: Advanced Safety Concepts <i>Exploration: Administrative Controls, Engineering Controls, Chemical Process Safety Management</i>
1230 - 1245	Break
1245 - 1420	Domain 4: Advanced Safety Concepts (cont'd) <i>Analysis: Fleet Safety Principles, Hazardous Materials Management.</i>
1420 - 1430	Recap <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow</i>
1430	Lunch & End of Day Three

Day 4

0730 - 0930	Domain 5: Emergency Preparedness, Fire Prevention & Security <i>Comprehensive Study: Emergency Response Planning, Fire Prevention & Protection Systems</i>
0930 - 0945	Break
0945 - 1045	Domain 5: Emergency Preparedness, Fire Prevention & Security (cont'd) <i>Practical: Incident Management, Work on real-world scenarios</i>
1045 - 1130	Domain 6: Occupational Health & Ergonomics <i>Study: Basic Toxicology Principles, Ergonomics & Human Factors Principles</i>
1130 - 1230	Domain 6: Occupational Health & Ergonomics (cont'd) <i>Practical Exercise: Evaluation of Occupational Exposures</i>
1230 - 1245	Break
1245 - 1420	Domain 7: Environmental Management Systems <i>Detailed Exploration: Environmental Protection & Pollution Prevention Methods, Hazardous Waste Management Practices • Group Activity: Strategies for Sustainable Environmental Management</i>
1420 - 1430	Recap
1430	Lunch & End of Day Four

Day 5

0730 - 0930	Domain 8: Training/Education <i>Exploration: Education & Training Methods & Techniques, Training Requirements</i>
0930 - 0945	Break
0945 - 1130	Domain 8: Training/Education (cont'd) <i>Hands-on: Development of Training Programs & Assessment Instruments</i>
1130 - 1230	Domain 9: Law & Ethics <i>Legal Issues, Protecting Confidential Information, Ethics Related to Audits</i>
1230 - 1245	Break

1245 - 1345	Domain 9: Law & Ethics (cont'd) <i>Practical Application: Interpreting Laws, Regulations and Applying Concepts of BCSP Code of Ethics</i>
1345 - 1400	Course Conclusion <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course</i>
1400 - 1415	POST-TEST
1415 - 1430	<i>Presentation of Course Certificates</i>
1430	<i>Lunch & End of Course</i>

MOCK Exam

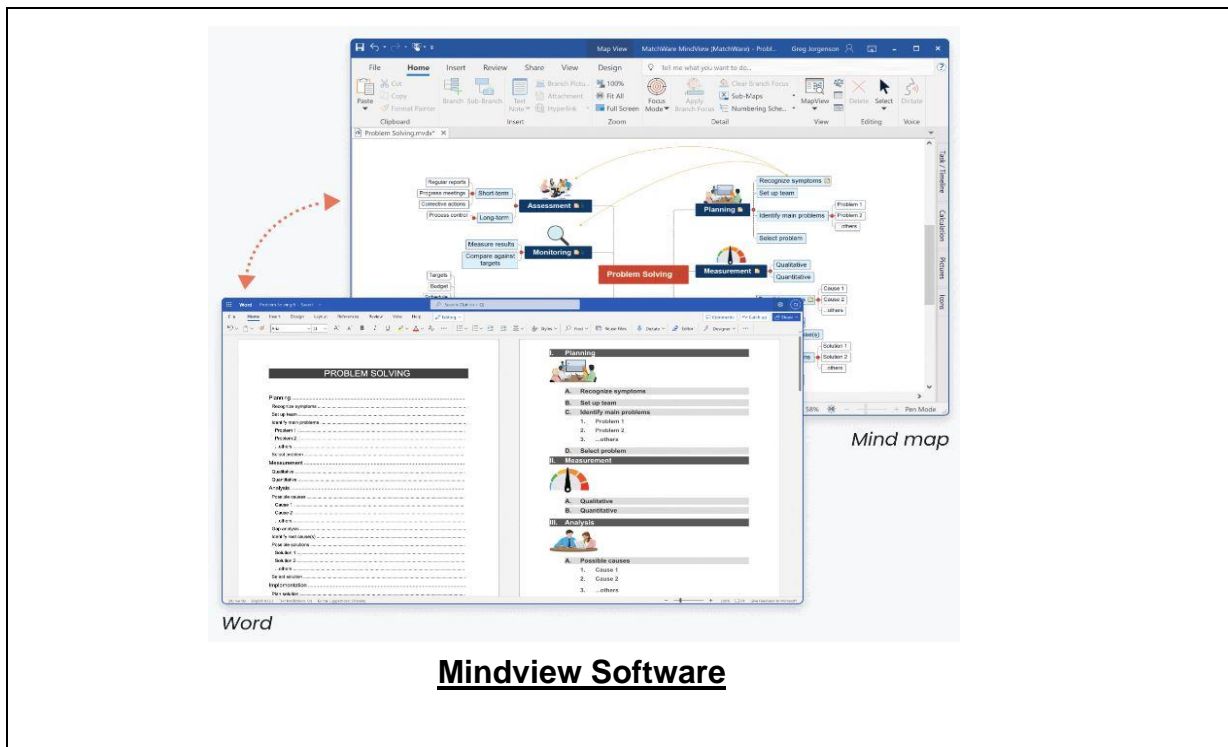

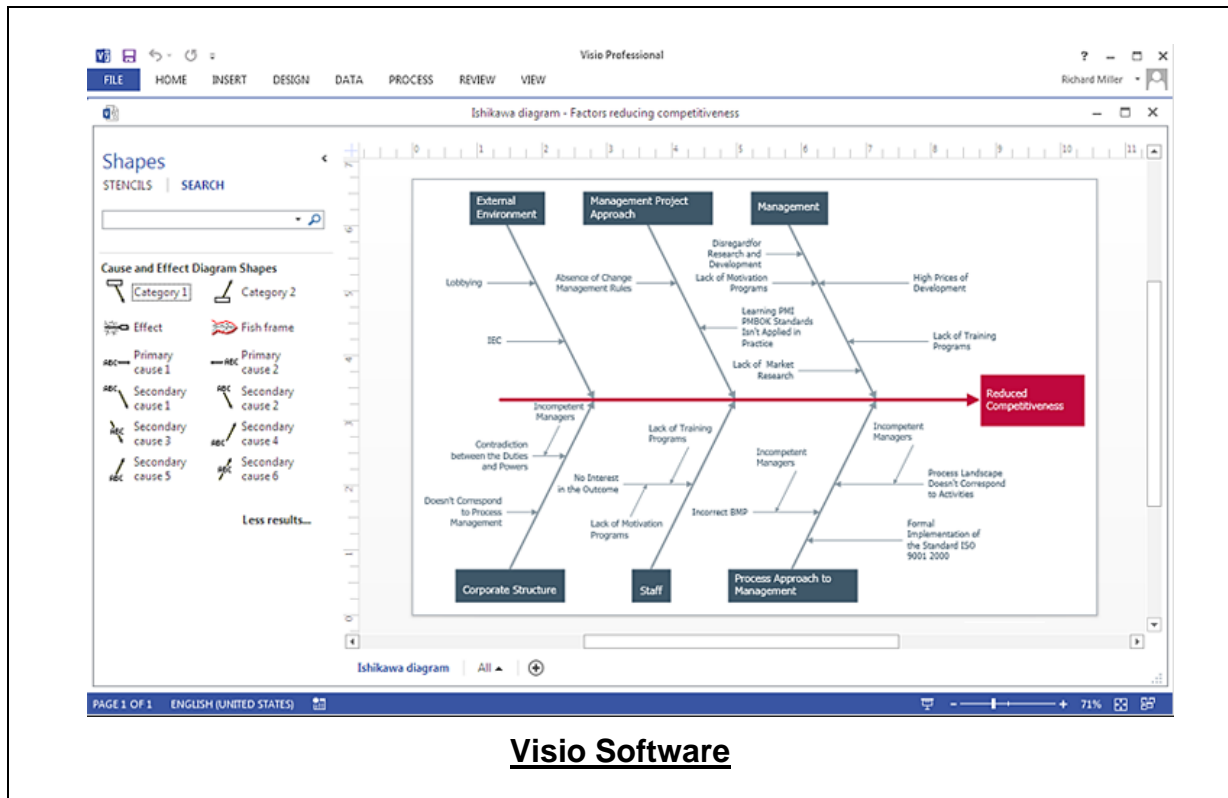

Upon the completion of the course, participants have to sit for a MOCK Examination similar to the exam of the Certification Body through Haward’s Portal. Each participant will be given a username and password to log in Haward’s Portal for the MOCK Exam during the 30 days following the course completion. Each participant has only one trial for the MOCK exam within this 30-day examination window. Hence, you have to prepare yourself very well before starting your MOCK exam as this exam is a simulation to the one of the Certification Body.

Simulator (Hands-on Practical Sessions)

Practical sessions will be organized during the course for delegates to practice the theory learnt. Delegates will be provided with an opportunity to carryout various exercises using our state-of-the-art “Workplace Risk Assessment”, “Visio”, “Mindview” and “QRA System” simulators.

The screenshot shows the 'Workplace Risk Assessment' software interface. The title bar reads 'Workplace Risk Assessment Input Form'. The main window has a red header with the title 'Workplace Risk Assessment' and version 'WRAM v1.0.00 © On Safe Lines QHSE Software'. Below the header is a menu bar with options: New, Save, Delete, Search..., Select, Topic Help, Forum, Duplicate, Images, and Close. The interface includes a 'Generate No >' field with 'Ref No: WP-130929144934' and a 'Location / Site / Section:' dropdown set to 'Ramsgate'. There are tabs for 'Operations and Activities Undertake at this Location / Site / Section' and 'Test Workplace Risk Assessment'. A navigation bar shows sections 5 through 12, with 'Section 7 & 8' selected. The main content area is titled 'Lighting' and contains five questions (5.1 to 5.5) with 'Y/N/NA' dropdown menus and 'Details / Comments' text boxes. A right-hand sidebar lists various assessment categories like 'Admin' Arrangements / Main Systems', 'Ventilation & Temperature', 'Lighting', etc. The footer of the software shows 'www.onsafelines.com' and navigation controls for records.

Workplace Risk Assessment

The screenshot displays the QRA System Software interface with several windows open:

- Tree View (Left):** Shows a hierarchical structure of system components such as Engine System, Fuel System, Propeller, Aerodynamics, Avionics, and Wings System.
- Flowchart (Top Right):** A fault tree diagram showing the relationship between various failure events and their causes.
- Graph (Bottom Left):** A plot of CDF (Cumulative Distribution Function) versus Parameter, showing an S-shaped curve representing the distribution of a parameter.
- Statistics Table (Bottom Right):** A table with the following data:

STATISTIC	VALUE
Mean	0.3501
1st	0.1153
5th	0.2262
10th	0.2544
50th	0.3513
90th	0.4438
95th	0.4859
99th	0.5157
