

COURSE OVERVIEW OE0042

Marine Hazards Prevention & Control
(Collision, Grounding & Flooding, Fire, etc.)

Course Title

Marine Hazards Prevention & Control (*Collision, Grounding & Flooding, fire, etc.*)

Course Date/Venue

Session 1: September 22-26, 2024/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

Session 2: December 15-19, 2024/Horus Meeting Room, Holiday Inn & Suites Maadi, Cairo, Egypt

Course Reference

OE0042

Course Duration/Credits

Five days/3.0 CEUs/30 PDHs

Course Description

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

Any vessel that experiences flooding of one or more of its compartments is exposed to the risk of losing its stability and thus the risk of sinking. Collision and grounding are considered to be the most relevant accident scenarios that may cause flooding of ships, and will thus be the topic of this course.

Even though a lot of effort is constantly being made to keep vessels safe and measures are always taken to avoid serious accidents, one can never completely eliminate the probability of a serious accident to occur on board a ship. If an incident takes place, one can try to prevent it from evolving into a serious accident by for example intentionally beaching a ship that is taking in water and thus keep it from sinking. If such measures fail however, an evacuation provides a last opportunity to minimize the consequences of the accident by reducing the number of fatalities. In such situations, the evacuation performance will be very important and an orderly and timely evacuation can save the lives of many people on board.

This course is designed to provide delegates with an up-to-date knowledge and skills on marine hazards prevention and control in general and collision, grounding and flooding in particular. It covers the marine hazards; distress and salvage; fire-fighting; static electricity and security; shipboard systems and ship's equipment; ship damage control and salvage; management of safety and emergencies; enclosed spaces; shipboard operations; carriage and storage of hazardous materials; human element considerations; special ship types; safety and fire protection; emergency preparedness and evacuation; communications and mooring; precautions on ship and terminal during cargo handling; and safety management.

The course presents probabilities of collision and grounding and investigates possible events subsequent to an incident, e.g. possibilities of flooding, sinking and capsizing, expected time to sink, etc. Evacuations in case of collision and grounding are also covered and the consequences are estimated in terms of expected loss of lives.

Course Objectives

Upon the successful completion of this course, each participant will be able to:-

- Apply and gain a comprehensive knowledge on marine hazards prevention and control including collision, grounding and flooding
- Be fully prepared during collision, grounding and flooding
- Learn the on-board lifesaving appliances, salvage and damage control equipment and techniques
- Describe marine emergency procedures, communication and protocols as well as distress alert and operations, lifesaving and rescue operations
- Discuss the marine hazards, boat lifesaving appliances, salvage and damage control
- Identify the various types of marine hazards and various scenarios
- Carryout preventive measures for collision, grounding, flooding, fire or other emergencies
- Recognize shipboard systems and ship's equipment
- Employ ship damage control, salvage as well as management of safety and emergencies
- Carryout shipboard operations, emergency preparedness and emergency evacuation
- Implement proper communications and mooring

Exclusive Smart Training Kit - H-STK®

*Participants of this course will receive the exclusive “Howard Smart Training Kit” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials, sample video clips of the instructor’s actual lectures & practical sessions during the course conveniently saved in a **Tablet PC**.*

Who Should Attend

This course covers systematic techniques and methodologies on marine hazards prevention and control in general and collision, grounding and flooding in particular. It is suitable for tug masters, controllers (PO), skippers and senior marine staff.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Fee

Dubai	US\$ 8,000 per Delegate + VAT . This rate includes H-STK® (Howard Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.
Cairo	US\$ 8,000 per Delegate + VAT . This rate includes Participants Pack (Folder, Manual, Hand-outs, etc.), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Course Certificate(s)

Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.

Certificate Accreditations

Certificates are accreditation by the following international accreditation organizations:

- 

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology’s courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units** (CEUs) in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant’s involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant’s CEU and PDH Transcript of Records upon request.

- 

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Captain Sergey Kole, is an **International Expert in Port Operations & Management** with over **20 years** of **onshore and offshore** experience within the **Oil & Gas** industry. His expertise evolves in **Marine Terminal Operations & Management, Marine Hazards Prevention & Control, Marine Communication Systems, Marine Safety, Ship Management, Oil Terminal Planning, Vessels Operations, Terminal Management & Support Operations, Oil Spill Contingency & Emergency Response Plan, Qualitative & Quantitative Risk Assessments, Terminal Planning, Oil Tanker Storage Planning, Cargo Transfer Handling, Loading & Discharging, Ballasting, Tank Cleaning, Crude Oil Washing, Ship Handling and Radar Navigation.** Further, he is well-versed in **Survival Craft & Rescue Boats, Dynamic Positioning, Anti-Piracy Preparedness & Response, Shipping Maintenance System, Oil & Chemical Tanker, Liquefied Gas Tanker, Inert Gas System, Crude Oil Tanker & Gas Carrier, Offshore Logistics & Supply Management, Marine Fleet Management & Operations, International Maritime Conventions & Codes, Marine Radar, Port Traffic Control Systems & Instrumentation, H²S Hazard Awareness, Firefighting, Medical Care Onboard, Carriage of Dangerous & Hazardous Substances, Ballast Water & Sediment Management.**

During his career life, Captain Sergey has gained his technical and marine expertise through various challenging and key positions such as the **Captain, Port Master, Marine/Port Manager, Project Manager, Port Supervisor, Marine Coordinator, Operations Director, Chief Officer, 2nd Officer, Crewing Consultant and Ship Chandler** for several international companies such as **ZADCO, Rusalina Yacht Company, Jr Shipping, Carisbrooke Shipping, Unicorn Petrol ve Kimya, Q Shipping BV, Miedema Shipping CV, Rah Management BV, Petrobulk Maritime Inc., Empross Lines Ship Management, Melcard Ltd., Aquarian Shell Marine Inc. and Square Ltd.**

Captain Sergey has a **Bachelor** degree in **Navigation** from the **Kiev State Academy of Water Transport** and **Petrozavodsk River School, Ukraine** respectively. He is a **Certified Instructor/Trainer** and has delivered various trainings, courses, seminars, workshops and conferences internationally.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1

0730 – 0745	Registration & Coffee
0745 – 0800	Welcome & Introduction
0800 – 0815	PRE-TEST
0815 – 0900	Introduction to Marine Hazards Hazard Types & Category • Ignition Sources • Portable Electrical Equipment • Management of Electrical Equipment and Installations in Dangerous Areas • Use of Tools • Equipment Made of Aluminium • Cathodic Protection Anodes in Cargo Tanks • Communications Equipment • Spontaneous Combustion • Auto-Ignition • Asbestos
0900 – 0915	Distress & Salvage Types of Marine Hazards & Various Scenarios • Procedures for Own/Other Vessel in Cases of Collision, Grounding, Flooding, Fire or Other Emergencies – Preventive Measures
0915 – 0930	Break
0930 – 1140	Distress & Salvage (cont'd) Lifesaving Appliance & FiFi Equipment on Board
1215 – 1230	Break
1230– 1415	Distress & Salvage (cont'd) Disabled Vessels, Distress Scenarios & Radio Communications Procedures
1415 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day One

Day 2

0730 – 0840	Shipboard Systems Fixed Inert Gas Systems • Venting Systems • Cargo and Ballast Systems • Power and Propulsion Systems • Vapour Emission Control (VEC) Systems • Stern Loading and Discharging Arrangements
0840 – 0915	Ship's Equipment Shipboard Fire-Fighting Equipment • Gas Testing Equipment • Lifting Equipment
0915 – 0930	Break
0930 – 1140	Ship Damage Control & Salvage Boat Watertight Integrity & Damage Control • Salvage System & Equipment
1215 – 1230	Break
1230– 1415	Ship Damage Control & Salvage (cont'd) Post Flooding Procedures • Stability, List & Trim Enhancement
1415 – 1430	Recap Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow
1430	Lunch & End of Day Two

Day 3

0730 – 0840	Ship Damage Control & Salvage (cont'd) <i>Small Vessels Stability & Flooding Calculations</i>
0840 – 0915	Ship Damage Control & Salvage (cont'd) <i>Emergency Towing Operation</i>
0915 – 0930	<i>Break</i>
0930 – 1140	Ship Damage Control & Salvage (cont'd) <i>Salvage Convention & Agreements</i>
1215 – 1230	<i>Break</i>
1230 – 1350	Ship Damage Control & Salvage (cont'd) <i>Liabilities of Master, Crew, Owners/Charterers & Underwriters</i>
1415 - 1430	Recap <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow</i>
1430	<i>Lunch & End of Day Three</i>

Day 4

0730 – 0840	Management of Safety & Emergencies <i>The International Safety Management (ISM) Code • Safety Management Systems • Permit to Work Systems • Hot Work • Welding and Burning Equipment</i>
0840 – 0915	Management of Safety & Emergencies (cont'd) <i>Other Hazardous Tasks • Management of Contractors • Repairs at a Facility Other Than a Shipyard • Shipboard Emergency Management</i>
0915 – 0930	<i>Break</i>
0935 – 1140	Shipboard Operations <i>Cargo Operations • Stability, Stress, Trim and Sloshing Considerations Tank Cleaning • Gas Freeing • Crude Oil Washing</i>
1215 – 1230	<i>Break</i>
1230 – 1415	Shipboard Operations (cont'd) <i>Ballast Operations • Cargo Leakage into Double Hull Tanks • Cargo Measurement, Ullaging, Dipping and Sampling • Transfers Between Vessels</i>
1415 – 1430	Recap <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Topics that were Discussed Today and Advise Them of the Topics to be Discussed Tomorrow</i>
1430	<i>Lunch & End of Day Four</i>

Day 5

0730 – 0840	Emergency Preparedness <i>Terminal Emergency Planning – Plan Components and Procedures • Definition and Hierarchy of Emergencies • Terminal Emergency Plan • Emergency Removal of tanker from Berth</i>
0840 – 0915	Emergency Evacuation <i>Evacuation and Personnel Escape Routes • Survival Craft • Training and Drills</i>
0915 – 0930	<i>Break</i>

0930 – 1215	Communications <i>Procedures and Precautions • Pre-Arrival Exchange of Information • Pre-Berthing Exchange of Information • Pre-Transfer Exchange of Information • Agreed Loading Plan • Agreed Discharge Plan • Agreement to Carry Out Repairs</i>
1215 – 1230	<i>Break</i>
1230 – 1345	Mooring <i>Personnel Safety • Security of Moorings • Preparations for Arrival • Mooring at Jetty Berths • Berthing at Buoy Moorings</i>
1345 - 1400	Course Conclusion <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course</i>
1400 – 1415	POST-TEST
1415 – 1430	<i>Presentation of Course Certificates</i>
1430	<i>Lunch & End of Course</i>

Practical Sessions

This practical and highly-interactive course includes real-life case studies and exercises: -

Course Coordinator

Mari Nakintu, Tel: +971 2 30 91 714, Email: mari1@haward.org
