

COURSE OVERVIEW RE0628
Certified Machinery Lubrication Technician (MLT) Level -I
ICML-MLT Certification

Course Title

Certified Machinery Lubrication Technician (MLT)
 Level -I: ICML-MLT Certification

Course Date/Venue

July 21-25, 2024/Boardroom 1, Elite Byblos Hotel Al Barsha, Sheikh Zayed Road, Dubai, UAE

Online Exam Window

As per ICML Schedule

Course Reference

RE0628

Course Duration/Credits

Five days/3.0 CEUs/30 PDHS

Course Description

This practical and highly-interactive course includes real-life case studies and exercises where participants will be engaged in a series of interactive small groups and class workshops.

In the severe weather of the Middle East, lubrication is a major challenge to every maintenance department. High operating costs, downtime, and wear-out of equipment make the life of every maintenance professional in the Middle East very difficult. Bearing in mind that the process plant is usually losing approximately 7% of its entire maintenance budget simply due to poor lubrication practices, it is vital that the maintenance practices become more optimized and proper lubrication program be implemented.

This course will introduce and establish the role of precision lubrication and analysis for improving machine reliability. It will provide an overview of lubricant construction and the general principles involved in lubricant selection for common plant machinery. Handling and application practices for both oils and gases will be reviewed.

The course will introduce contamination control strategies as a way to improve machine performance. It will provide a thorough introduction to the principles of lubricant analysis and introduce appropriate methods to collect samples as the first step in lubricant based machine condition assessment.

Haward Technology has designed this interactive training course in accordance with the guidelines of the “*International Council for Machinery Lubrication*” (ICML) including the ICML “*Body of Knowledge*” for MLT. On completion of this course, participants will sit for the ICML exam (optional) which will be administered in the last day of the course. Successful participant will be awarded an ICML certificate of competency assigning him to be a Machinery Lubrication Technician (MLT) Level-I. This certificate will provide recognition of the qualifications and competence of individuals to perform field lubricant analysis for machinery condition monitoring.

Course Objectives

Upon the completion of this course, each successful participant will be able to:-

- Get certified as a “*Machinery Lubrication Technician (MLT) Level - I*” from the International Council for Machinery Lubrication (ICML)
- Carryout maintenance strategy as well as discuss the lubrication theory covering tribology fundamentals, functions of a lubricant, hydrodynamic lubrication, elasto-hydrodynamic lubrication and mixed-film lubrication
- Describe lubricants comprising of base-oils, additives and their functions, physical, chemical, performance properties and classifications of oil lubricant and grease lubricant, grease lubrication, thickener types and thickener compatibility
- Employ lubricant selection, lubricant application, preventive and predictive maintenance
- Apply lube condition control for filtration and separation technologies, filter rating, filtration system design and filter selection
- Perform lube storage and management and implement lubricant receiving procedures, proper storage, inventory management, lube storage containers, proper storage of grease-guns and other lube application devices, maintenance of automatic grease systems as well as health and safety assurance

Exclusive Smart Training Kit - H-STK®

Participants of this course will receive the exclusive “*Haward Smart Training Kit*” (H-STK®). The H-STK® consists of a comprehensive set of technical content which includes **electronic version** of the course materials conveniently saved in a **Tablet PC**.

Who Should Attend

This course provides an overview of all significant aspects and considerations of machine lubrication for all maintenance and reliability professionals including maintenance engineers, reliability engineers, lubricant analysts, lubrication technicians, craftsmen and millwrights, equipment operators, maintenance supervisors, predictive maintenance technicians, lubricant industry professionals and laboratory analysts.

Exam Eligibility & Structure

Exam candidates shall have the following minimum pre-requisites:

- Education and/or Experience - Candidates must have at least two years education (post-secondary) or on-the-job training in one or more of the following fields: machine lubrication, engineering, mechanical maintenance and/or maintenance trades.
- Training - Candidate must have received 16 hours of documented formal training in machinery lubrication as outlined in the Body of Knowledge of the MLT I. For online or recorded training, exercises, practice exams, and review exercises may be included in the training time total but shall not exceed three hours of the required course time. Candidate shall be able to provide a record of this training to ICML that shall include the candidate's name, the name and signature of the instructor, the dates of the training, and the number of hours spent in the training.
- Examination - Each candidate must successfully pass a 100 question, multiple-choice examination that evaluates the candidate's knowledge of the topic. Candidates have three hours to complete the closed-book examination. A score of 70% is required to pass the examination and achieve certification.

Course Certificate(s)

- (1) Internationally recognized certificates will be issued to all participants of the course who completed a minimum of 80% of the total tuition hours.
- (2) ICML certificates will be issued to participants who have successfully completed the course and passed the exam at the end of the course. Successful candidate will be certified as a *"Machinery Lubrication Technician (MLT) Level - I"*.

- (3) Official Transcript of Records will be provided to the successful delegates with the equivalent number of ANSI/IACET accredited Continuing Education Units (CEUs) earned during the course.

Haward Technology has been approved as an Authorized Provider by the International Association for Continuing Education and Training (IACET), 1760 Old Meadow Road, Suite 500, McLean, VA 22102, USA. In obtaining this approval, Haward Technology has demonstrated that it complies with the ANSI/IACET 1-2013 Standard which is widely recognized as the standard of good practice internationally. As a result of their Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for programs that qualify under the ANSI/IACET 1-2013 Standard.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking Continuing Education Units (CEUs) in accordance with the rules & regulations of the International Association for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology is accredited by

P.O. Box 26070, Abu Dhabi, United Arab Emirates | Tel.: +971 2 3091 714 | Fax: +971 2 3091 716 | E-mail: info@haward.org | Website: www.haward.org

Certificate Accreditations

Haward Technology is accredited by the following international accreditation

- 

International Council for Machinery Lubrication (ICML)

This Machinery Lubrication Technician Certification course complies with the **ICML (International Council for Machinery Lubrication)** regulation and is designed to certify successful participant as a Machinery Lubrication Technician (MLT).
- 

The International Accreditors for Continuing Education and Training (IACET - USA)

Haward Technology is an Authorized Training Provider by the International Accreditors for Continuing Education and Training (IACET), 2201 Cooperative Way, Suite 600, Herndon, VA 20171, USA. In obtaining this authority, Haward Technology has demonstrated that it complies with the **ANSI/IACET 2018-1 Standard** which is widely recognized as the standard of good practice internationally. As a result of our Authorized Provider membership status, Haward Technology is authorized to offer IACET CEUs for its programs that qualify under the **ANSI/IACET 2018-1 Standard**.

Haward Technology's courses meet the professional certification and continuing education requirements for participants seeking **Continuing Education Units (CEUs)** in accordance with the rules & regulations of the International Accreditors for Continuing Education & Training (IACET). IACET is an international authority that evaluates programs according to strict, research-based criteria and guidelines. The CEU is an internationally accepted uniform unit of measurement in qualified courses of continuing education.

Haward Technology Middle East will award **3.0 CEUs** (Continuing Education Units) or **30 PDHs** (Professional Development Hours) for participants who completed the total tuition hours of this program. One CEU is equivalent to ten Professional Development Hours (PDHs) or ten contact hours of the participation in and completion of Haward Technology programs. A permanent record of a participant's involvement and awarding of CEU will be maintained by Haward Technology. Haward Technology will provide a copy of the participant's CEU and PDH Transcript of Records upon request.

- 

British Accreditation Council (BAC)

Haward Technology is accredited by the **British Accreditation Council** for **Independent Further and Higher Education** as an **International Centre**. BAC is the British accrediting body responsible for setting standards within independent further and higher education sector in the UK and overseas. As a BAC-accredited international centre, Haward Technology meets all of the international higher education criteria and standards set by BAC.

Course Instructor(s)

This course will be conducted by the following instructor(s). However, we have the right to change the course instructor(s) prior to the course date and inform participants accordingly:

Mr. Den Bazley, PE, BSc, is a Senior Mechanical Maintenance Engineer with over 25 years of industrial experience in Lubrication Theory, Lubricant Selection, Lube Storage & Management, Oil, Gas, Refinery, Petrochemical, Power and Utilities industries. His wide expertise includes Condition Based Monitoring, Piping System, Process Equipment, Mechanical Integrity, Maintenance Management, Reliability Management, Reliability Centred Maintenance (RCM), Total Plant Maintenance (TPM) and Reliability-Availability-Maintainability (RAM), Engineering Drawings, Codes & Standards, P&ID Reading, Interpretation & Developing. His experience covers Design, Construction and Maintenance of Storage Tank, Hydraulic Control Valves, rotating and static equipment including Safety Relief Valves, Boilers, Pressure Vessels, Tanks, Heat Exchangers, Bearings, Compressors, Pumps, Pipelines, Motors, Turbines, Gears, Lubrication Technology and Mechanical Seals. Further, he has experience in Waste Water Treatment, Water Treatment, Welding, NDT, Vehicle Fleet and Budgeting & Cost Control. He is well-versed in CMMS and various International Standards including ISO 14001.

During his career life, Mr. Bazley has gained his practical and field experience through his various significant positions and dedication as the **Engineering Manager, Maintenance Manager, Construction Manager, Project Engineer, Mechanical Engineer, Mechanical Services Superintendent, Quality Coordinator and Planning Manager** for numerous international companies like **ESSO, FFS Refinery, Dorbyl Heavy Engineering (VECOR), Vandenberg Foods (Unilever), Engen Petroleum, Royle Trust and Pepsi-Cola.**

Mr. Bazley is a **Registered Professional Engineer** and has a **Bachelor** degree in **Mechanical Engineering**. Further, he is a **Certified Engineer** (Government Certificate of Competency GCC Mechanical Pretoria), a **Certified Instructor/Trainer**, a **Certified Internal Verifier/Assessor/Trainer** by the **Institute of Leadership and Management (ILM)**, an active member of the **Institute of Mechanical Engineers (IMechE)** and has delivered numerous trainings, courses, seminars and workshops internationally.

Training Fee

US\$ 7,000 per Delegate + **VAT** This rate includes H-STK® (Haward Smart Training Kit), buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

Exam Fee

US\$ 320 per Delegate + **VAT**.

Accommodation

Accommodation is not included in the course fees. However, any accommodation required can be arranged at the time of booking.

Training Methodology

All our Courses are including **Hands-on Practical Sessions** using equipment, State-of-the-Art Simulators, Drawings, Case Studies, Videos and Exercises. The courses include the following training methodologies as a percentage of the total tuition hours:-

- 30% Lectures
- 20% Practical Workshops & Work Presentations
- 30% Hands-on Practical Exercises & Case Studies
- 20% Simulators (Hardware & Software) & Videos

In an unlikely event, the course instructor may modify the above training methodology before or during the course for technical reasons.

Course Program

The following program is planned for this course. However, the course instructor(s) may modify this program before or during the course for technical reasons with no prior notice to participants. Nevertheless, the course objectives will always be met:

Day 1 Sunday, 21st of July 2024

0730 - 0800	Registration & Coffee
0800 - 0815	Welcome & Introduction
0815 - 0830	PRE-TEST
0830 - 0930	Maintenance Strategy Why Machines Fail • The Impact of Poor Maintenance on Company Profits
0930 - 0945	Break
0945 - 1015	Maintenance Strategy (cont'd) The Role of Effective Lubrication in Failure Avoidance
1015 - 1130	Lubrication Theory Fundamentals of Tribology • Functions of a Lubricant
1130 - 1230	Lubrication Theory (cont'd) Hydrodynamic Lubrication (Sliding Friction) • Elasto-Hydrodynamic Lubrication (Rolling Friction)
1230 - 1245	Break
1245 - 1330	Lubrication Theory (cont'd) Mixed-Film Lubrication
1330 - 1420	Lubricants Base-Oils • Additives & their Functions
1420 - 1430	Recap
1430	Lunch & End of Day One

Day 2 Monday, 22nd of July 2024

0730 - 0930	Lubricants (cont'd) Oil Lubricant Physical, Chemical & Performance Properties & Classifications
0930 - 0945	Break

0945 - 1130	Lubricants (cont'd) <i>Grease Lubrication (How Grease is Made?, Thickener Types, Thickener Compatibility, Grease Lubricant Physical, Chemical & Performance Properties & Classifications)</i>
1130 - 1230	Lubricant Selection <i>Viscosity Selection • Base-Oil Type Selection</i>
1230 - 1245	Break
1245 - 1420	Lubricant Selection (cont'd) <i>Additive System Selection • Machine Specific Lubricant Requirements (Hydraulic Systems, Rolling Element Bearings, Journal Bearings, Reciprocating Engines, Gearing & Gearboxes)</i>
1420 - 1430	Recap
1430	Lunch & End of Day Two

Day 3 Tuesday, 23rd of July 2024

0730 - 0930	Lubricant Selection (cont'd) <i>Application & Environment Related Adjustments</i>
0930 - 0945	Break
0945 - 1130	Lubricant Application <i>Basic Calculations for Determining Required Lubricant Volume</i>
1130 - 1230	Lubricant Application (cont'd) <i>Basic Calculations to Determine Re-Lube & Change Frequencies</i>
1230 - 1245	Break
1245 - 1420	Lubricant Application (cont'd) <i>When to Select Oil; When to Select Grease?</i>
1420 - 1430	Recap
1430	Lunch & End of Day Three

Day 4 Wednesday, 24th of July 2024

0730 - 0930	Lubricant Application (cont'd) <i>Effective Use of Manual Delivery Techniques</i>
0930 - 0945	Break
0945 - 1100	Lubricant Application (cont'd) <i>Automatic Delivery Systems (Automated Deliver Options: Automated Grease Systems, Oil Mist Systems, Drip & Wick Lubricators; Deciding When to Employ Automated Lubricators; Maintenance of Automated Lubrication Systems)</i>
1100 - 1230	Preventive & Predictive Maintenance <i>Lube Routes & Scheduling • Oil Analysis & Technologies to Assure Lubrication Effectiveness</i>
1230 - 1245	Break
1245 - 1420	Preventive & Predictive Maintenance (cont'd) <i>Equipment Tagging & Identification</i>
1420 - 1430	Recap
1430	Lunch & End of Course

Day 5 Thursday, 25th of July 2024

0730 - 0930	Lube Condition Control <i>Filtration & Separation Technologies • Filter Rating</i>
0930 - 0945	Break

0945 - 1100	Lube Condition Control (cont'd) <i>Filtration System Design & Filter Selection</i>
1100 - 1230	Lube Storage & Management <i>Lubricant Receiving Procedures • Proper Storage & Inventory Management • Lube Storage Containers</i>
1230 - 1245	<i>Break</i>
1245 - 1330	Lube Storage & Management (cont'd) <i>Proper Storage of Grease-Guns & Other Lube Application Devices • Maintenance of Automatic Grease Systems • Health & Safety Assurance</i>
1330 - 1400	Course Conclusion <i>Using this Course Overview, the Instructor(s) will Brief Participants about the Course Topics that were Covered During the Course</i>
1400 - 1415	POST-TEST
1415 - 1430	<i>Presentation of Course Certificates</i>
1430	<i>Lunch & End of Course</i>

MOCK Exam

Upon the completion of the course, participants have to sit for a MOCK Examination similar to the exam of the Certification Body through Haward’s Portal. Each participant will be given a username and password to log in Haward’s Portal for the MOCK exam during the 7 days following the course completion. Each participant has only one trial for the MOCK exam within this 7-day examination window. Hence, you have to prepare yourself very well before starting your MOCK exam as this exam is a simulation to the one of the Certification Body.

Practical Sessions

This practical and highly-interactive course includes real-life case studies and exercises:-
